

NACE[®] Nonmetallics INTERNATIONAL Conference 2018

Seen to many as a cost-effective solution to corrosion problems in oil and gas, nonmetallics have grown in popularity as an essential resource for combating corrosion. The new NACE Nonmetallics Conference provides a unique look at the expanded use, advancements in technology, and potential applications of nonmetallics for corrosion mitigation.

NACE Nonmetallics Conference brings over 100 attendees looking for the latest solutions for their corrosion issues. This event is a must-attend for organizations interested in protecting their assets through nonmetallics applications, as well as companies offering related products or services who want to meet regional and world leaders in nonmetallic engineering.
