**TITLE INDEX (1962-2016, VOL. 1-55)**

A word about these listings: The author and title indexes contained in *MP-Lit™* were taken from the archives of *Materials Performance*. Many older indexes have been scanned, and accuracy may vary with the quality of the scan and the original document. The style of listings may vary due to variances in the original index listings. When searching by author name, consider using only the author's last name or search by all variants (i.e., the same author might be listed as J. Smith on one paper but J.E. Smith or J.E. Smith, Jr., on another).

</table>
### August (No. 8)
- Corrosion Inhibitor Screening Test for Oil Wells, R. Wieland, J.R. Bruce (24)
- Improper Fabrication Is Major Cause of Stainless Steel Failures at Two Coastal Steam Stations, E.J. Bladh, (32)
- Dissimilar Metal Effects on Grounding Systems, Report of NACE Technical Committee T-4A (85)
- Properties, Uses, and Application Techniques of Baked Unmodified Phenolic Coatings, Report of NACE Technical Committee T-6A (87)
- Physical and Chemical Properties of Unsaturated Acid-Containing Polyester Coatings, Report of NACE Technical Committee T-6A (91)
- NACE-Sponsored Research—How You Can Help, E.B. Backensto (94)

### September (No. 9)
- Some Gyp-Mud Drilling Fluids Can Be Corrosive, C.O. Bundrant (11)
- Gamma Ray Devices for On-Stream Refinery Inspections, W. Wyganowski (18)
- Missle Corrosion Problems: Details Given on Protective Coatings Applied to Polaris IRBM, Leo E. Gatzel, C.R. Feller (24)
- October Emphasis on Solving Cooling Water Corrosion Problems (33)
- Characteristics and Applications of Zinc Anodes for Cathodic Protection, T.J. Lennox, Jr. (37)
- National Association of Corrosion Engineers—How It Operates, Staff Feature (79)
- Chemical Resistance of Polyvinyl Chloride Plastisols, Report of NACE Technical Committee T-6A (89)
- Urethane Protective Coatings for Atmospheric Exposures, Report of NACE Technical Committee T-6B (95)
- Method for Rapid Detection of Sulfur Embrittlement of Nickel, Walter A. Szymanski (100)

### October (No. 10)
- Influence of Inhibitors on Corrosion and Scale Deposition on Heat Transfer Surfaces in Fresh-Water Cooling Systems, Herman Kerst (10)
- Design of Equipment and Operation of Laboratory Tests for Heat Transfer Surface Inhibition in Cooling Water, A.J. Freedman (22)
- Wood Maintenance for Cooling-Water Towers, Cooling Tower Institute (32)
- MP•LIT Index to Materials Performance (6)
- Corrosion Control in a Refinery Salt-Water Cooling System, W.S. Janssen (42)
- Laboratory Evaluation of Fresh Cooling Water Inhibitors for Open Recirculating Systems, A. Orman Fisher (54)
- Brackish Cooling Water Versus Refinery Heat Exchangers, J.M. Bird, Kenneth L. Moore (70)
- Corrosion by Fresh Cooling Water Minimized at Oil Refinery, R.A. Loucks (78)
- Device That Permits Feeding Sulfuric Acid to Cooling Towers at Rates Proportional to Make-Up Flow, G.H. Sanders, H.R. Newsom (95)
- Steam Sterilization and Distillation of Poison Help Protect Cooling Tower Wood from Biological Attack (84)
- Wooden Cooling Tower Studies Being Made (86)
- Automatic Water Treatment Control Is Developed (86)
- Fiberglass Panels Used for Cooling Towers and Tanks (87)
- Compound Resists Attack by Marine Organisms on Wood and Fiberglass (88)
- Chemical Corrosion Clinic (90)

### November (No. 11)
- Zinc Anodes in a Crude Oil Tanker, A.R. Cook, B.C. Lattin (8)
- What Management Wants to Know About Corrosion Control Investments, Wallace B. Crowston, Ha Harries (18)
- Hot-Dip Galvanizing: A Good Corrosion-Resistant Coating Poorly Sold by Galvanizers, J.R. Hull (28)
- Tests to Five Years Indicate Aluminum Alloy Pipe Gives Economical Service, J.R. Whiting, T.E. Wright (36)
- Survey of Electrical Grounding Problems, W.K. Abbott, C.M. Schillmoller (48)
- Plastic Materials of Construction, Progress Report on Activities of NACE Technical Unit Committee T-5D (89)
- Recommended Practice for Handling Tubular Goods for Sulfide Environments, Status Report of NACE Technical Unit Committee T-1F (97)
- List of 16-mm Films on Corrosion (99)
- Rubber Lining Resists Wear (61)
- Hot-Water Tanks Tested (63)
- Cement Linings Solve Tank Corrosion Problems (66)
- Inhibitors Added to Lube (70)

### December (No. 12)
- Porcelain Coatings for Low-Temperature Air Preheater Service, Lloyd D. Grimes, Harold W. Huffcut (8)
- MP’s Annual Index (84-85)
- How Monsanto Uses Technicians in Corrosion Control, Oliver W. Siebert (19)
- Results of a Field Study to Select a Tubing Program for Ellenberger Gas, F.E. Blount, B.C. Arnwine, R.J. Chandler (24)
- Engineered Approach to Industrial Maintenance Painting, C.W. Sisler (28)
- Failure from Corrosion of Hydraulic Actuators, Robert J. Cappell (30)
- New Data Show that Steel Has Low Corrosion Rate During Long Seawater Exposure, C.P. Larrabee (95)
- Dead Sea Brought to Life (39)
- Coating Protects Lock Gates for 15 Years (42)
- Long Exposure Underground Has Little Effect on Steel Pilings (45)
- Alloy Deposited in Compression Resists Corrosion Cracking (49)
January (No. 1)
Instrument Promises to Permit Measuring Wall Thickness of Pipelines in Place, T.R. Schmidt ................................................................. 8
Continuous Injection of Overhead Receiver Water Controls Refinery Condenser and Exchanger Corrosion by Ammonium Chloride, R.H. Carlton ................................................................. 15
Fume-Sprayed Fusible Alloys, Walter B. Meywe ........................................................................................................................................... 21
An Improved Method for Evaluation of Tank Lining Systems, A.F. Torres, S.S. Feuer ................................................................................................................................. 28
Corrosion from the Ship Owner's Viewpoint, Gerald C. Soltz ................................................................................................................................. 36
Various Products Made of New Thermoplastic, J.P. Cogdell ................................................................................................................................. 48
Corrosion Problems in Phosphoric Acid and Phosphate Fertilizer Manufacture, R.E. Gackenbach ................................................................................................................................. 50
Versatile Polypropylene, Thad S. Fennema ........................................................................................................................................... 58
Stress Corrosion Cracking of Brass in Nitric Acid Vapor Causes Collapse of Lab Lighting Fixture, J.P. Fraser ................................................................................................................................. 70
Pyrophoric Powders—Hot Stuff ........................................................................................................................................... 67
Horizontal Lead Burning Rig Saves Time, Cuts Costs ................................................................................................................................. 69
Linear Accelerator X-Ray Welds ........................................................................................................................................... 70
Tubing Survives Longer with Gas Pressure Vent ........................................................................................................................................... 74

February (No. 2)
Cathodic Protection of Buried Pipelines in Congested Areas, Lewis H. West ................................................................................................................................. 11
Cathodic Protection and Isolation Solve Corrosion Problems of Subsurface Piping in Generating Stations, E.F. Bladholm, Louis J. Kormendy ................................................................................................................................. 20
Oil Field Salt-Water Storage Tanks Protected Cathodically, Carl E. Hedborg ................................................................................................................................. 30
Role of Current Distribution in Cathodic Protection, Robert E. Meredith ................................................................................................................................. 39
Cathodic Protection Reduces Corrosion Fatigue Cracking of Steel in Seawater, J.L. Nichols ................................................................................................................................. 46
Corrosion Control Practices on Pipe-Type Power Cables, J.C. Howell ................................................................................................................................. 54
Rapid Duct Survey, Edmond K. Benson ........................................................................................................................................... 59
Designing Automatic Controls for Cathodic Protection, J.P. Sudabrin ................................................................................................................................. 64
Problems and Results with Deep Anodes, L.L. Flor, W.T. Keith ................................................................................................................................. 68
Recommended Practices Applicable to Placing Cement Linings in Oil Field Steel Tubular Goods, Report of NACE Technical Committee T-1G ........................................................................................................................................... 95
Lead Anodes Protect Hudson River Pier ........................................................................................................................................... 100
New Zinc Anodes Found Seaworthy ........................................................................................................................................... 77
Competition Opens for Copper and Brass Awards ........................................................................................................................................... 81

March (No. 3)
Comparing the Properties of Zinc Dust Coatings in a Variety of Environments, Charles G. Munger ........................................................................................................................................... 8
Epoxy-Motor Linings for Sewers Proved Best by Extensive Testing Program, R.W. Childers ........................................................................................................................................... 18
Characteristics and Uses of Petroleum Base Rust Preventives, Howard B. Carpenter ........................................................................................................................................... 28
Elements of Surface Preparation, E.W. Oakes ........................................................................................................................................... 33
Laboratory Tests of Zinc-Filled Coatings, V.L. Flack ........................................................................................................................................... 36
Some Advantages of Zinc-Rich Coatings Based on Inorganics, Daniel H. Gelfer ........................................................................................................................................... 46
Flame-Sprayed Aluminum for High-Temperature Protection, A.P. Shepard ........................................................................................................................................... 47
Epoxy-Polyamide Mixture Resists Splash Zone Corrosion on Offshore Structures, R.J. Jordan ........................................................................................................................................... 56
Structural Steel Coated Better and Cheaper Before Erection, R.J. Koch ........................................................................................................................................... 62
Plant Maintenance Corrosion Problems, E.H. Caldwell ........................................................................................................................................... 68
Fleet Vehicles Protected Against Rust by Inhibited Grease Pipeline Coating ........................................................................................................................................... 71
Recommendations on Materials for Sour Service, Report of NACE Technical Committee T-1B ........................................................................................................................................... 89
Oil Well Materials for Resistance to Hydrogen Sulfide or Stress Corrosion Cracking (Tentative Specifications) ........................................................................................................................................... 93
Report of NACE Technical Committee T-1B ........................................................................................................................................... 93

April (No. 4)
Corrosion Inhibitor Squeeze Technique: Laboratory Study of Formation Premature Damage, J.K. Kerver, F.A. Morgan, III ........................................................................................................................................... 10
New Materials for Electrical Grounding, W.K. Abbott, C.M. Schillmoller ........................................................................................................................................... 22
Epoxy-Motor Perform Well Immersed in Water if Properly Formulated and Applied, Robert J. Wray, Kenneth B. Tator ........................................................................................................................................... 30
Pre-Treatment and De-Sludging of Cooling Water Systems, Charles W. Brown, L.F. Probst ........................................................................................................................................... 41
Permanent Field Repairs for Glassed-Steel Chemical Equipment, Charles M. Knoll ........................................................................................................................................... 50
Protection of Motor Vehicles Against Tropical Corrosion, R.F. Conner ........................................................................................................................................... 60
Determination and Prevention of Fungal Deterioration of Cooling Towers, William Yoel ........................................................................................................................................... 64
How One Company Saves Thousand of Dollars by Using Plastic Materials, W.N. Hall ........................................................................................................................................... 70
Test Exchangers Permit Better Evaluation of Cooling Water Treatment, A.S. Krisher ........................................................................................................................................... 76
Cooling Tower Hardware Failures, K.R. Walston, N.B. Heckler ........................................................................................................................................... 82

May (No. 5)
Review: Cathodic Protection Theory and Practice for Newcomers and Oldtimers Alike, J.P. Sudabrin ........................................................................................................................................... 8
Glass-Reinforced Polyester Laminates Test to 10 Years Show Effects of Warm and Hot Corrosive Solutions, R.E. Gackenbach ........................................................................................................................................... 17
Reinforced Plastics for Hoods, Spray Chambers, Ducts, Fans, Scrubbers, Stacks, and Tanks, Fred W. Arndt ........................................................................................................................................... 26
Extended Screening Tests of Plastic Materials of Construction in Organic Chemicals, L.S. VanDelinder ........................................................................................................................................... 30
Special Cathodic Protection for Offshore Acoustic Towers Used in Oceanographic Studies, Warren O. Clark ........................................................................................................................................... 49
June (No. 6)

Corrosion Resulting from Microbial Fuel Tank Contamination, C.B. Ward ................................................................. 10
Microbial Fuel Tank Corrosion: Mechanisms and Contributory Factors, A.V. Churchill .................................................. 18
Microorganisms Fail to Grow in Furane-Lined Jet Fuel Storage Tanks, James M. McElroy ............................................. 24
Ten-Year Weathering Data on Aluminum Alloys, William H. Allor, Jr., Fred M. Reinhart .............................................. 30
Galvanic Corrosion Behavior of Aluminum in Atmosphere, Hugh P. Godard ................................................................. 38
Brittle Failure of Aluminum Alloys in Mercury and Liquid Zinc Amalgam, J.D. Corrie, W.B. Steward, J.M. McCaughney, H. Markus 48
Aluminum Alloys in Offshore Pipelines, E.T. Wanderer .................................................................................................. 54
Susceptibility of Aluminum Alloys to Stress Corrosion, Donald O. Sproule, H.C. Rutemiller ........................................ 62
Measuring Wall Thickness by the Pulse Echo Technique, Ronald T. Nisbet ................................................................. 66
Chemical Resistance of Fluorocarbon Coatings and Linings, Report of NACE Technical Unit Committee T-6A ............... 91
Vinyl Coatings for Prevention of Atmospheric Corrosion, Report of NACE Technical Unit Committee T-6B .................. 96
New Aluminum Applications ........................................................................................................................................... 73
Book News ........................................................................................................................................................................ 76

July (No. 7)

Accelerated Tests Show Glass Flake Filler Improves Performance of Polyester Resin Coating, I.N. Einhorn, J.D. Crecca, Jr. ........ 10
Acrylic Latex Systems for Industrial Maintenance Painting, R.H. Bacon, D.W. Pennington, M.W. Zembral ......................... 20
Force Curing of Chemical-Resistant Coatings, W.T. Singleton, Jr. .................................................................................... 27
Effects of Metal Surface Conditions on Durability of Protective Coating Bonds, R.J. Lipinski ............................................. 30
Surface Preparation and Sealing of Cement Surfaces, John F. Montle, Hercules D. Tarlas ............................................. 36
A Brief Look at Polyurethane Coatings, J.W. Conway ...................................................................................................... 44
Vinyl Solution Coatings: Effective Maintenance Films, F. Parker Helms ........................................................................ 48
Well Casing as an Electrochemical Network in Cathodic Protection Design, Maurice A. Biardian, Robert P. Sterk ............. 58
Chemically Cured Coal Tar Coatings for Atmospheric Exposures, Report of NACE Technical Committee T-6B ............... 92
Epoxy Finish for Aircraft ....................................................................................................................................................... 71
Wooden Piling Repair .............................................................................................................................................. 74
Modified Epoxy Retains Gloss After 18 Months .................................................................................................................. 75
Paint Gauge Measures Multiple Coat Films ...................................................................................................................... 76
Ceramic Coating Protects Incinerator Surface .................................................................................................................... 80

August (No. 8)

Field Tests Show Corrosion Resistance of Liquid Fertilizer Service in Stainless Steels, Thomas F. Shaffer, Jr. ....................... 8
Oil Field Corrosion Inhibitors Evaluated by Film Persistency Test, Edwin D. Junkin, Jr., D.R. Fincher ............................. 18
Inhibition of Monoethanolamine Solutions, J.R. Motley, D.R. Fincher ............................................................................. 20
Inhibitors Unjustified for Controlling Automobile Corrosion from De-Icing Salts, J.D. Palmer ........................................ 31
More Articles on Inhibitors .................................................................................................................................................... 33

A New Dimension in Underwater Maintenance, Raymond P. Devolay .......................................................................................................................................................11
Corrosion, Deicing Salts, and the Environment, R.L. Chance ...............................................................................................................................................................16
A History of Stray Traction Current Corrosion in the United States, John J. Meany, Jr ........................................................................................................................................22
Corrosion Rates to Be Expected at Zero Blowdown of Recirculating Water, C.C. Fowlkes ..........................................................................................................................26
Corrosion by Concrete of Embedded Material Other Than Reinforcing Steel, H. Woods ...........................................................................................................................................31
A Case for Cathodic Protection of Lead Sheath Telephone Cables, W.R. Stead ..................................................................................................................................................33
# Materials Performance

## November (No. 11)
- Waveguide Corrosion, *A.J. Raffalovich* ................................................................. 9
- Surfaces Produced by Abrasive Blasting of Steel, *C.B. Doherty* ............................... 12
- Cathodic Protection of Internal Surfaces of Pipes Containing Seawater, *R.E. Groover, M.H. Peterson* ................................................................. 24
- Pitting and Crevice Corrosion Resistance of Commercial 18% Cr Stainless Steels, *R.J. Brigham* ................................................................. 29
- Superheated Steam Oxidation of HK-40 Reformer Tubing, *Komei Kasahara* .......... 31

## December (No. 12)
- Bay Area Rapid Transit System (BART), *H.E. Bomar, Roy O. Dean, James A. Hanck, Michael D. Orton, P.L. Todd* ................................................................. 9
- Early Chloride Corrosion of Reinforced Concrete—A Test Report, *E. Atimay, P.A. Ferguson* ................................................................. 18
- Comparison of Corrosion Rates: Wireline-Cut Plastic-Coated Oil Well Tubing vs Wireline-Cut Bare Tubing, *Glenn R. Roberson* ......................... 26

## January (No. 1)
- Corrosion Control Methods for Electrically Bonded Joints in Aircraft, *A.W. Morris, J.J. Reilly* ................................................................. 9
- Exotic Gaskets, *R.G. Staples* ................................................................. 14
- Corrosion of Semiconductor Metallized Contacts, *E.B. Hakim* .............................. 16
- Steel Embrittlement Problems Associated with Hot-Dip Galvanizing—Causes, Mechanisms, Controls, and Selected References, *R.D. McDonald* .......... 31

## February (No. 2)
- Case Histories: Lack of Predesign Corrosion Survey Proves Costly (Early Corrosion Failures in Sewage Treatment Plant), *Percy Hort* .................................................. 37
- Corrosion Inhibitor Studies on Aluminum, *George Schick* ...................................... 23
- Status Report: Explosion-Bonded Clad Plate for Industrial Equipment, *C.P. Williams* ................................................................. 30

## March (No. 3)
- Factors Affecting the Sulfide Stress Cracking Performance of High-Strength Steels, *J.B. Greer* ................................................................. 11
- Automatic Control to Optimize Cooling Water Treatment, *Kenneth E. Gasper* .......... 33
- Cleaning of Printed Circuit Boards to Remove Ionic Soils, *J.W. Denison, Jr.* ........ 36
- Has Technology Failed?, *D.A. Gaudion* ................................................................. 40

## April (No. 4)
- Corrosion Problems in the Food Processing Industry—An Overview, *Lyle D. Perrigo* ................................................................. 27
- Effect of Corrosion Products on the Flavor of Processed Food, *D.B. Cash* ................. 28
- Problem and Hazards of Metallic Ion Contamination in Food, *P. Muneta* .......... 30

## May (No. 5)
- Entrainment of Water by Flowing Oil, *M. Wicks, J.P. Fraser* ....................................... 9
- Fireside Corrosion in Municipal Incinerators vs Refuse Composition, *D.A. Vaughan, H.H. Krause, Walter K. Boyd* ................................................................. 16
- Economic Advantage of Deferred Topcoat Zinc-Based Painting Systems, *C.P. Dillon* ................................................................. 29
- Monitoring and Control of Cathodic Protection of Offshore Structures, *J.H. Morgan* ................................................................. 37

## June (No. 6)
- Resistance of Commercially Available High-Strength Tubular Goods to Sulfide Stress Cracking, *J.L. Battle, T.V. Miller, M.E. True* ................................................................. 11
Linear Polarization Method for Corrosion Rate Measurements in Limestone Slurry Scrubber, P. Burda ................................................................. 27
High-Temperature Crude Oil Corrosivity Studies, J. E. Slater, Warren E. Berry, B. Paris, Walter K. Boyd ................................................................. 31
Experience with High-Strength Oil Field Tubular Goods in Sour Service, T. M. Swanson, J. P. Tralmer ................................................................. 33
Development of Higher Strength HS-Resistant Steels for Oil Field Applications, P. J. Grobner, D. L. Sponseller, W. W. Cias ................................. 35

July (No. 7)
Reheaters in Systems for Scrubbing Stack Gases, G. L. Crow ........................................................................................................................ 9
Experiment Design in Corrosion Control, S. B. Twitchell, P. J. Lackmeyer ................................................................................................ 14
Corrosion Correlations with Ammonia and Hydrogen Sulide in Air Coolers, E. E. Ehmke ........................................................................ 20
Stratification of Water Properties Along the Louisiana Coast and Its Influence on Cathodic Protection Systems, Richard M. Vennett, R. B. Matthews 31
Importance of High-Purity in Stainless Steels for Nitric Acid Service—Experience from Plant Service, U. Blom, B. Kvarnback ................................. 43

August (No. 8)
A Study of Corrosion Rates in an Operating Desalting Plant, J. A. Manning, S. V. Carleton ................................................................................. 9
Review: Corrosion of Bare Concentric Neutrals in URD Systems, Kenneth G. Compton .................................................................................. 14
Correlation Between Long-Term Testing of Aluminum Alloys for Desalination and Electrochemical Methods of Evaluation, R. A. Bonevitz, Ellis D. Verink, Jr. ..................................................................................................................... 16
Pipeline Telluric Current Interferences as One Phase of a Wider Interdisciplinary Technological Problem, T. G. Procter ................................................. 24
Protective Systems for Fastener Areas of Carrier-Based Naval Aircraft, Robert N. Miller, G. G. Seeliger, W. A. Boggs ................................................ 28
Critical pH Scaling Indexes, Herbert Feitler ................................................................................................................................................................. 33
Use of Low-Interstitial 26% Cr-1% Mo Stainless Steel in Chemical Plants, C. P. Dillon .................................................................................... 36
Cable Connection and Splice Corrosion Protection, W. R. Neail .................................................................................................................................................. 38

September (No. 9)
New Aspects of the Application of Cathodic Protection to Offshore Facilities, Jack G. Davis, E. P. Doremus, R. B. Pass ........................................... 9
Service Experience and Stress Corrosion of Inconel 600 Bellows Expansion Joints in Turbine Steam Environments, L. D. Kramer, S. T. Michael, F. W. Pent 15
Hot Seawater Corrosion of Copper-Based Alloys, Ralph W. Ross, Jr., D. B. Anderson .................................................................................... 27
Electrochemical Investigation of Passivating Mild Steel Surfaces, J. D. Martin, William P. Banks ............................................................ 33
Large Diameter Field Filament Wound Tanks, W. B. Jessup ................................................................................................................................. 37
Environmental Impact Assessment of Cooling Towers, J. R. Bartlit, M. D. Williams .................................................................................. 39
Effect of Columbia Additions in Austenitic Stainless Steel Castings to Inhibit Intergranular Corrosion, G. A. Minick, D. L. Olson .............................. 41
Corrosion of Telephone Load Coil Cases and “T” Carrier Cases in Manholes, R. Stoneman .................................................................................. 44
Feasibility Study of Applying Concrete Over External Thin Film Submarine Pipe Coatings, L. C. Choate ........................................................................ 45

October (No. 10)
Galvanic Coupling of Some Stainless Steels to Copper Underground, E. Escalante, W. F. Gerhold ...................................................................... 16
Use of Irradiated Heat Shrinkable Polymers for Corrosion/Electrolysis Protection and Repair, V. E. Walsh ................................................................. 27
Coating Aluminum Aircraft Alloys to Improve Resistance to Marine Stress Corrosion Cracking, Robert N. Miller, G. G. Seeliger ............................. 31
Galvanized Steel—Added Cost or Capital Investment?, T. J. Kistler .................................................................................................................. 34
Discussion: Galvanized Steel—Added Cost or Capital Investment?, C. P. Dillon; Reply: T. J. Kistler ................................................................. 37
Cathodic Protection of Borehole Casing, M. Unz ......................................................................................................................................................... 40

November (No. 11)
An Approach to the Reporting and Evaluation of Corrosion Coupon Exposure Results, H. G. Byars, B. R. Gallop ......................................................... 9
Corrosion Resistance of Copper-Clad Stainless Steel Cable Shielding Materials, Robert Babolian, Gardner S. Haynes .......................................... 16
Relation of Tube Manufacturing Variables to Corrosion and Corrosion Product Release Rates of Inconel 600 in a Simulated Pressurized-Water Reactor Primary Water, G. C. Bodine, Jr., J. W. Carter .................................................................................................................. 22
Corrosion of Distillation Equipment by HNO3-HF Solutions During HNO3 Recovery, R. Mah, K. Terada, D. L. Cash .............................................. 28
Failure Mechanisms Associated with Plastic-Lined Piping Systems, J. F. Delahant ...................................................................................... 31
Seawater Corrosion of 90-10 and 70-30 Cu-Ni: 14-Year Exposures, K. D. Ejird, D. B. Anderson ................................................................. 37
Comparative Results on Chloride Stress Corrosion Cracking of Steam Generator Materials in Cyclic Steam Environment, J. P. Hammond, P. Patriarca, G. M. Slaughter, W. A. Maxwell ........................................................................................................... 41

December (No. 12)
Heater Tube Melting Due to Carburization, Bruce D. Craig ................................................................................................................................. 9
Replaceable Deep Grounded Evaluation, Joe F. Tatum .................................................................................................................................................. 12
Nature and Control of Calcium Orthophosphate Deposition in Cooling Water Systems, R. G. Varsanik ................................................................. 16
Fatigue Properties of Prior-Corroded Aluminum Sheet Alloys, N. L. Person ........................................................................................................ 22
Corrosion Monitoring in the East Crossfield D-1 Gas Gathering System, H. J. Heinrichs ................................................................................. 27
Deep-Water Testing of Sacrificial Anodes: Part 2, W. B. Mackay .................................................................................................................................................... 39

©NACE INTERNATIONAL
January (No. 1)

Guest Editorial: Stress Corrosion Cracking in Nuclear Power Plant Steam Generator Tubes, Warren E. Berry .................................................................7
Zinc Silicate Coatings—The Australian Scene, R.N. Ride .................................................................9
Survey of Corrosion in Hydrocracker Effluent Air Coolers, R.L. Pielch ..................................................15

Corrosion and Cathodic Protection of Steel Grounding Systems, S. Nikolakos .......................................................................................... 11
Internal Cathodic Protection of Cement-Lined Steel Pipes, Finn O. Jensen, R.D. Tems .................................................................................. 16
Coatings with and Without Cathodic Protection in Salt-Water Ballast Tanks: A 5-Year Report, B.S. Fulz .......................................................... 24
Fireside Corrosion in Kraft Recovery Boilers: An Overview, H.N. Tran, D. Barbary, M. Hapa ........................................................................ 40
Usage and Performance of Nickel-Containing Stainless Steels in Both Saline and Natural Waters and Brines, Arthur H. Tuthill ............. 47
Recent Developments in Corrosion-Resistant Metallic Alloys for Construction of Seawater Pumps, T.J. Glover .................................................. 51
Crevices Corrosion Resistances of Stainless Steels in Marine Environments: The Influence of N, Mn, and S, John W. Oldfield ................. 57
Quantitative Measurement of Hydrogen Charging Rates Into Steel Surfaces Exposed to Seawater Under Varying Cathodic Protection Levels, W.H. Thompson ........................................................................................................................................... 63
Effect of Hostile Marine Environments on the Al-Zn-In-Si Sacrificial Anode, C.F. Schrieber, R.W. Murray .......................................................... 70
Everything You Always Wanted to Know About Personal Computers But Were Afraid to Ask; Part 2, K.W. Nicholas .......................................................... 79

August (No. 8)
Flexible Cathodic Protection Criteria, Frank E. Rizzo .................................................................................................................. 17
Cathodic Protection of Power Line Structure Foundations, E.L. Kirkpatrick .............................................................................................. 20
Polyester Tape for Above-and-Below-Ground Protection, D.A. Hill ......................................................................................................... 30
Fiberglass-Reinforced Plastic Linings for Tank Bottom Repair, S.D. Johnson .................................................................................................. 32
Effect of Dimethyl Sulfoxide on Oil Field Elastomers and Thermoplastics for Seal Applications, John C. Vieic, David Cain, Kevin J. Kennelley, P.I. Abrams ........................................................................................................................................... 46
Carbon Dioxide Resistance of Fiberglass Oil Field Pipe, Kenneth J. Oswald .............................................................................................. 51
Impact of Sulfate-Reducing Bacteria on Welded Copper-Nickel Seawater Piping Systems, Brenda J. Little, Patricia A. Wagner, J. Jacobus ........................................................................................................................................... 57
Microbiologically Influenced Corrosion Failures of Austenitic Stainless Steel Welds, S.W. Borenstein ........................................................................ 62
Testing for the Presence of Sulfate-Reducing Bacteria, Robert E. Tatum, K.M. Stanton, R.C. Ebersole .................................................. 71
Effect of 25 Years of Oil Field Flow Line Service on Epoxy Fiberglass Pipe, Kenneth J. Oswald ........................................................................................................................................... 81
Everything You Always Wanted to Know About Personal Computers But Were Afraid to Ask; Part 3, K.W. Nicholas .......................................................... 84

September (No. 9)
Cathodic Protection of Steel in Concrete, C.J. Mudd, G.I. Mussinelli, M. Tettamanti, P. Pedoferri ........................................................................ 18
Coating Concrete—An Overview, R.E. Foscan, H.H. Kline .......................................................................................................................... 34
Using Computer Programs to Control Corrosion and Scale in Water Systems, R.W. Lane .................................................................................. 46
Desiccant Drying of Gas Pipelines, G.A. LaCassee, T. Ingvorden .................................................................................................................. 48
Corrosion-Free Heating and Cooling Using Teflon Heat Exchangers, C.W. Wenner, Jr. .................................................................................. 55
Properties of an Age-Hardenable, Corrosion-Resistant, Nickel-Based Alloy, R.B. Frank, T.A. Debold ........................................................................ 59
An Overview of Deaerator Cracking, Part 1, John A. Kelly, C.E. Gazi, T.M. Larange .................................................................................. 70
A New Method of Monitoring Corrosion, M.I. Manning, A.G. Crouch, B. Lloyd .............................................................................................. 74

October (No. 10)
Cathodic Protection Design Using Ceramic-Coated Anodes, Ashok Kumar, M.D. Armstrong .......................................................... 19
Current Drain to Cathodically Protected Stainless Steels in Seawater, Rolf E. Eye .................................................................................. 24
Fundamentals of Wet Abrasive Blasting, J.P. Woodson .......................................................................................................................... 31
Using Recyclable Steel Grid for Portable Field Applications, J.A. Giese, II .............................................................................................. 35
Planning, Instrumentation, and Evaluation of Atmospheric Corrosion Tests; Part 1, Sheldon W. Dean, Jr. .................................................. 56
Duplex Alloy 255 in Marine Applications, D.C. Agarwal .......................................................................................................................... 63
Avoiding Zirconium Equipment Pyrophoric Incidents, A.F. Condiff ........................................................................................................ 70
An Overview of Deaerator Cracking, Part 2, John A. Kelly, C.E. Gazi, T.M. Larange .................................................................................. 73
Light Propane Gas (LPG) Storage Vessel Cracking Experience, J.E. Cantwell .............................................................................................. 79

November (No. 11)
Factors Affecting the Cathodic Disbonding of Pipe Coatings, H.M. Smith, M.F. Bird, B.H. Penna ........................................................................ 19
Impressed Current Cathodic Protection of a Caisson Structure for Arctic Conditions, A.D. Willis, D.G. Lingnau .................................................. 25
Corrosion Performance of Aluminum in Coal Railcars, J.F. Hersh .................................................................................................................. 37
NACE Standard RP0386-86—Application of a Coating System to Interior Surfaces of Covered Railroad Hopper Cars in Plastics, Food, and Chemical Service ........................................................................................................................................... 40

©NACE INTERNATIONAL
Thermal and Chemical Stability of Phosphate Layers During Car Body Corrosion, J.P. Servais, B. Schmitz, V. Leroy .................................................. 56
Planning, Instrumentation, Evaluation of Atmospheric Corrosion Tests; Part 2, Sheldon W. Dean, Jr. .......................................................... 64
Over-the-Road Truck Trailer Corrosion, R.R. Staebler .................................................. 69
Reducing Corrosion in Chemical Transport Trailers, Gene Liening .................................. 72
Evaluating and Repairing Fire Damage to Chemical Process Plant Equipment; Part 1, Dale R. McIntyre .................................................. 79

December (No. 12)
Pipe Coating as an Engineered Part of the Cathodic Protection System, G. Mills .................................................. 13
Fiberglass-Reinforced, Plastic-Lined Steel Versus Rubber-Lined Steel, T.E. Reder .................................................. 19
Coatings and Nonmetallic Materials in Life Extension Work, Thomas I. Aldinger .................. 23
Corrosion Inhibition and Monitoring in Sea/Gas Pipeline Systems, Y. Wu, K.E. McSperritt, G.D. Harris .................................................. 29
Planning, Instrumentation, and Evaluation of Atmospheric Corrosion Tests; Part 3, Sheldon W. Dean, Jr. .................................................. 35
Practical Guide to Using 6% Mo Austenitic Stainless Steel, Ralph M. Davison, James D. Redmond .................................................. 39
Improved High-Nickel Alloy Castings, J.L. Gossett .................................................. 44
New Aspects of Stress Corrosion Cracking in Monoethanolamine Solutions, H.U. Schutt .................................................. 53
Evaluating and Repairing Fire Damage to Chemical Process Plant Equipment; Part 2, Dale R. McIntyre .................................................. 59

January (No. 1)
Cathodic Protection Anodes—Underground, David H. Kroon .................................................. 17
NACE Standard RP0388-88—Impressed Current Cathodic Protection on Internal Submerged Surfaced of Steel Water Storage Tanks .................................................. 21
Improved Corrosion Control by Coating in the Splash Zone and Subsea, R.C. John, W. Van Hooff .................................................. 41
Effects of Design on Corrosion of Pressure Vessel Transportation Equipment, R.C. Willard .................................................. 49

Selecting Cost-Effective Protective Coating Systems, Gordon H. Brevoort, A.H. Roebuck .................................................................................. 39
Environmental and Health Concerns Relating to Water and Wastewater Coating and Painting Projects, William B. Harper ............................................. 56
Practical Guide to Wear for Corrosion Engineers, Paul Crook ........................................ 64
Prevention of Stress Corrosion Cracking in Boiling Water Reactors, Robin L. Jones .............................................................. 70
Response of Aluminum Alloys to Particle Impacts, James R. Keiser, Mukand Rao .......... 80
Flow Loop Versus Rotating Probes—Experimental Results and Service Applications, Guenter A. Schmitt, W. Bruckhoff, K. Faessler, G. Blummen .............. 85

March (No. 3)
Corrosion Detection on Underground Gas Pipeline by Magnetically Assisted Alternating Current Impedance, R. Srinivasan, J.C. Murphy, C.B. Schroebl, R.S. Lillard .............................................................. 14
Multilayer Coating Systems for Buried Pipelines, Peter Blome, Gunnar Friberg 20
Developments in Coating Technology—A Marketing Perspective, Gary P. Sterling ............. 31
Waterborne Exterior Coatings in Railcar Industry, Wayne E. Kucz .................................................................................. 35
Corrosion of Reinforced Concrete Structures in Taiwan, Wei-Ming Lin, Tzu-Wang Jou .............. 38
Automobile Atmospheric Corrosion—Testing and Evaluation, Sheldon W. Dean, Jr. .... 48
Economic Evaluation of Fiberglass Tubing in Gas Well Service, Gordon N. Bass, Greg C. Maddux .............................................................. 57
Predicting Corrosion of Steel in Crude Oil Production, K.D. Efird
Investigation of Microbiologically Influenced Corrosion in a West Texas Waterflood, R.A. Agostini, R.D. Young

April (No. 4)
Effect of Marine Bacteria on Calcareous Deposition, Stephen C. Dexter, Shiaw-Ho Lin
Cathodic Protection of Aboveground Tank Bottoms with Secondary Containment Liners, David H. Park
Robotic Corrosion Inspection Crawler, Ashok Kumar, Ali Odeh, Fathi Ghorbel, Mark Spong
Chemical Simulator for Scale Problems in Oil and Gas Production, Lee N. Morgenenthaler, Zarif J. Khatif, R.N. French, K.R. Cox
Expansion Joints at NASA Space Shuttle Launch Site, Cordelia Ontiveros, Louis G. MacDowell, III
External Corrosion Control Methods for Aboveground Storage Tanks: An Overview, Harrie L. van Heuagen
Remaining-Life Prediction for Equipment in High-Temperature/Pressure Service, Carl E. Jaske, R. Viswanathan
Controlling Moisture Absorption, Ed Woo

May (No. 5)
Mesh Anode Cathodic Protection System: Freeman’s Bridge Test Site, Hannah C. Schell, David G. Manning
Physical Scale Modeling Verification with Shipboard Trials, A.R. Parks, E. Dail Thomas, K.E. Lucas
Cleaning Lined Tank Cars and Unlined Tank Cars for Lining Application, Kenneth W. Ferry
Influence of Deicing Salts on Motor Vehicle Corrosion, Bo Rendahl, Staffan Hedlund
Review: Corrosion Mechanisms Relevant to Automobile Corrosion, Jerome Kruger
Test Method to Evaluate Storage Compounds for Corrosion Inhibition, Ho Jin Choi, S.B. Jones
Maximizing Lining Life of Rubber-Lined Tank Cars, Richard K. Lewis
Stress Corrosion Cracking of Carbon Steel in DEA and “ADIP” Solutions, Ara J. Bagdasarian, Cathleen A. Shargay, John W. Coombs
Coatings for Hypersonic Applications, Josephine Covino, Karl Klemm, John Dykema

June (No. 6)
Use of Magnetic Flux Leakage Inspection Pigs for Hard Spot Detection and Repair, H. Michael Crump, Stefan Papenfuss
Cathodic Protection Using Scrap and Recycled Materials, Richard J. Kessler, Rodney G. Powers, Ivan R. Lasa
Technical Specifications for Concrete Coatings Work, Thomas I. Aldinger
Regulatory Need for Containment Structures, R. Phillip Calvo
Life Estimation of Elastomers Using Temperature-Stress Acceleration Techniques, John C. Vicic, David Cain, Steve Rolden, Long-Ji Su, Chia Chieh Chen
Comparison of Electronic Component Degradation in Field and Laboratory Environments, W.H. Abbott

July (No. 7)
Possibilities for Increasing Effectiveness of Anode-Backfill Systems, Jerzy Walaszewski
Overlooked Data Available from an Offshore Subsea Survey, Mark W. Mater
Electrical Inspection of Protective Coatings Applied to Concrete Surfaces, Darrel D. Byerley
Carbonate-Type Cracking in an FCC Wet Gas Compressor Station, E. Mirabal, S. Bhattacharjee, N. Pazos
Effect of pH and Temperature on Fiberglass-Reinforced Composites in Sodium Hypochlorite Solutions, Terry W. Cowley, M.A. Robertson
Use of Alternating Current Impedance Technique for Optimizing H2S Scavenger Injection in Well Flowlines, Perry I. Nice, Wally J. Georgie, A. Neil Rothwell

August (No. 8)
Monitoring Offshore Cathodic Protection Systems—Technologies and Regulatory Requirements, Jim N. Britton
Cathodic Protection Design Problems for Reinforced Concrete, Robert P. Brown, John S. Tinnea
Monolithic Linings and Coatings for Secondary Containment Structures, Fred E. Hazen
A Study of Practical Cases of Steel Corrosion in Reinforced Concrete—Causes and Solutions, Oladis Trocónis de Rincón, Miguel A. Sánchez, G. Orlando Perez, Daniel Contreras, Octavio García, Cesar Vezga
Offshore Water Injection System: Problems and Solutions, James E. Donham
Evaluation of an Atmospheric Corrosion Rate Monitor as a Time-Of-Wetness Meter, Fred H. Haynie, David C. Siles
Technical Summary: Salt Penetration and Corrosion in Prestressed Concrete Members, E. Paul Virmani
Performance of RA5SH, A New Carburization- and Sulphidation-Resistant Alloy, Gene R. Runaldell

September (No. 9)
Electrochemical Exposure Rack Test Results—Crystal River Nuclear Power Plant, George Nekoska, Brian Gautheran
Cleaning Pipelines Using High-Pressure Water Jets, Sidney A. Taylor, Gerald Chapman
Safety and Pneumoconioses: Abrasive Blasting and Protective Respiratory Equipment, Otis T. Logue
Chromized/Siliconized Diffusion Coatings for Iron-Based Alloys by Pack Cementation, Mark A. Harper, Robert A. Rapp
LDEF Mission Update: Composites in Space, Advanced Materials and Processes
Coatings Could Protect Composites from Hostile Space Environment, Ann F. Whitaker
Materials for Piping in Sulfuric Acid Production Plants, Michael Davis
Wear Simulation of Sucker Rod Couplings, William J. Schumacher

©NACE INTERNATIONAL
October (No. 10)
Conversion to an “On-Line” Corrosion Control Record System Using a Mainframe Computer, David A. Schramm .................................................. 18
Relationship Between Pitting, Stress, and Stress Corrosion Cracking of Line Pipe Steels, Timothy K. Christman .................................................. 23
Maintenance Painting Programs Founded on a Desktop Computer Database, George V. Spires ........................................................................ 33
Incineration of Recycled Liquors and Other Fuels in the Pulp and Paper Process, Rolf K. Brannland ................................................................. 45
Steam Cycle Protection for Pulp and Paper Systems, Kenneth L. Rossel, John A. Kelly, John Richardson ............................................................ 48
Coated Steel Sheets for Corrosion-Resistant Automobiles, Herbert E. Townsend, Jr. .......................................................... 60

November (No. 11)
Cathodic Protection for Steel Bulkheads Under Relieving Platforms, W.A. Tinker ....................................................................................... 20
Rapid Polarization Cathodic Protection in the Rijn Field, Kingsley C. Lunden, Timothy M. Stasny ............................................................. 24
Thermal Reclamation of Spent Blasting Abrasive ........................................................................................................................................ 32
Inorganic Coating Systems, Charles G. Manzer .................................................................................................................. 34
The Right Choice—Water or High Solids? George A. Roy, II ....................................................................................... 40
Corrosion Behavior of Exterior Automotive Trim System, Joseph T. Lentine .................................................................................. 48
Acid Deposition Impacts on Historic Bronze and Marble Statuary and Monuments, Donald A. Dobrski, John D. Meakin ........................................ 53
Integrity of Ammonia Storage Vessels—Life Prediction Based on Stress Corrosion Cracking Experience, Rolf Nyborg, Liv R. Lunde, Michael J. Conley ....................................................................................... 61

December (No. 12)
Cathodic Protection in Oilfield Brine, Stephen P. Turnipseed ....................................................................................... 16
Testing Methods for Underground Pipeline Coatings, Paul E. Partridge ....................................................................................... 22
New Advancements in the Use of Internal Plastic Coating for Enhanced Oil Recovery, John M. Nelson .......................................................... 27
Life Prediction of High-Pressure Gas Wells, Robert N. Tuttle, Richard S. Treseder ......................................................................................... 34
Correlation of Laboratory HIC Test and Field Sour Gas Environments Using Hydrogen Permeation Measurements, Malcolm G. Hay ....................................................................................... 43
Testing and Evaluation of Corrosion-Resistant Alloys, Bruce D. Craig, Jeff C. Collins, Robert L. Patrick, Troy Gilbert ....................................................................................... 51
Corrosion-Resistant Alloys for Sour Service, Morris C. Place, Jr., Robert D. Mack, Jr., Peter R. Rhodes ....................................................................................... 56

January (No. 1)
Data Loggers and Computerized Systems for Pipeline Stray-Current Monitoring, Ike Solomon, S. Maddocks ....................................................................................... 23
How Does the “Spike” Affect “Instant-Off” Readings? Larry D. Cox ....................................................................................... 28
Surface Preparation and Application of Plural-Component Coatings to Pipeline During Rehabilitation, Sidney A. Taylor ....................................................................................... 33
Double-Wrap Tape System Adopted for In Situ Recoating, Joseph L. Pilak ....................................................................................... 39
Failure Avoidance: Corrosion Detection and Repair of Storage Tank Bottoms by Tank Lifting, Joe Zeppuhar ....................................................................................... 45
Pigging and Chemical Treatment for Oil and Gas Pipelines, John S. Smart, III, Gary L. Smith ....................................................................................... 47
Ultrasonic Inspection Prompts Chemical Inhibitor Program, Peter M. Ricca ....................................................................................... 51
Wood—Nature’s High-Performance Material; Part 1, Oliver W. Siebert ....................................................................................... 57
Failure Investigation of a Pressure Vessel in a Catalytic Reformer Unit, V.S. Raja, A. Murugesan ....................................................................................... 63
Failure Avoidance: Corrosion of Lead in Contact with Stainless, B.V. Lee ....................................................................................... 68

February (No. 2)
Corrosion Control Survey Methods for Offshore Pipelines, Clark P. Weldon, David H. Kroon ....................................................................................... 19
Shielding Effects of Concrete and Urethane Foam External Pipeline Barrier Coatings, Daniel P. Werner, Thomas J. Barlo, Keith E.W. Coulson ....................................................................................... 24
Failure Avoidance: Electrically Conductive Polymer Concrete Overlay as Secondary Anode for Cathodic Protection, Y. Paul Virmani ....................................................................................... 30
Effects of Abrasive Characteristics and Coating Type on Blast Production Rates, Richard Armbruster, E.J. Johnson, Tony Gorton ....................................................................................... 33
Blast Comparators Versus Pictorial Standards—Choose Your Method Carefully, Charles F. Lenhart ....................................................................................... 36
Plastic Media Blasting—State of the Technology, Kenneth E. Abbott ....................................................................................... 38
Tracer Compounds Help Find Tank and Pipeline Leaks, Diane Rapaport ....................................................................................... 40
Innovative Practice—Cleaning with Air-Propelled Foam Media, Jon R. Cavallo ....................................................................................... 43
Use of Fluorescent Tracer Significantly Improves Control of Cooling Water Treatment, John E. Hoots, Philip M. Eastin ....................................................................................... 46
A View for Corrosion Monitoring, Alan N. Walker, Randy Thompson ....................................................................................... 52
Industry Trends—Fatigue and Corrosion Tax Aging Aircraft, Richard Duncan ....................................................................................... 54
Wood—Nature’s High-Performance Material; Part 2, Oliver W. Siebert ....................................................................................... 57
Corrosion of Metallic Fasteners in Low-Sloped Roofs, Walter J. Rossiter, Willard E. Roberts, Michael A. Streicher ....................................................................................... 62
Failure Avoidance: Weld Spatter Causes 316L Pitting Corrosion, D.G. Chakrapani ....................................................................................... 67

March (No. 3)
Economics of Cathodic Protection, Harry A. Webster ....................................................................................... 25
In-Situ Cathodic Protection of Existing Ductile Iron Pipes, Brian M. Green, Fiona Johnson, John De Rosa ....................................................................................... 32
Dual Laminate Construction for Difficult Corrosion Problems—Selection Criteria and Techniques, Gary Alan Glein ....................................................................................... 44
Polyethylene Liners for Internal Rehabilitation of Oil Pipelines, Mark Slack ....................................................................................... 49
Corrosion Inhibitors for Rebar Corrosion Control, Samson Hettiarachchi, A.T. Gaynor ....................................................................................... 62

### December (No. 12)

- **Severe Corrosion of A Gulf of Mexico Bridge**, J.J. Carpio, G. Hernandez-Duque, L. Martinez, T. Perez-Lopez ................................................................. 12
- **Cathodic Protection Diagnostic Expert System**, Vicki L. Van Blaricum, Ashok Kumar, Y.-T. Park ................................................................. 17
- **Corrosion in Methylphosphonic Difluoride**, Chester V. Zabielski, Milton Levy ................................................................. 37
- **Unusual Superheater Tube Wassage Associated with Carburization**, D. Lopez-Lopez, A. Wong-Noreno, L. Martinez ................................................................. 45
- **Corrosion Behavior of Muffler Materials in Automotive Exhaust Gas Condensates**, T. Uijro, M. Kitazawa, F. Togashi ................................................................. 49

#### Phorgotten Phenomena: Behavior of Lead in Organic Sulfate Environments, C.P. Dillon ................................................................. 54

### January (No. 1)

- **Stray-Current Control for the St. Louis Metrolink Rail System**, John H. Fitzgerald, III, Mark D. Lauber ................................................................. 21
- **Applying Cathodic Protection to Existing Prestressed Concrete Pipeline**, Manuel Garcia Peris, Miguel Angel Guillen ................................................................. 25
- **Potential Toxins in Old Coatings**, Geoff R. Byrnes ................................................................. 32
- **Concrete Advice: Drying and Measuring Moisture in Concrete; Part 1, Lew Harriman** ................................................................. 34
- **Get the Lead Out: What to Do When OSHA Shows Up: Step One**, L. Skip Vernon ................................................................. 37
- **Corrosion Inhibition in Supersour Gas Production**, J.A. Dougherty, B.A. Alink, D.F. Hochung Qui, Kees Van Gelder ................................................................. 41
- **Materials Selection for Produced Water Injection Piping**, Robert J. Franco ................................................................. 47
- **Corrosion of Reinforced Concrete in the Persian Gulf Region**, Vladimir Novokshchenov ................................................................. 51

#### Failure Avoidance: Corrosion Kills Sales Appeal, Ronald D. Crooks ................................................................. 55

#### Phorgotten Phenomena: Selecting Materials to Handle Concentrated Sulfuric Acid, C.P. Dillon ................................................................. 56

### February (No. 2)

- **Cathodic Protection Requirements of Ship Hull Materials**, P. Khambhatia, D.J. Tighe-Ford, K.J. Hinks ................................................................. 29
- **Chloride Contamination of Line Pipe—Its Effect on Fusion-Bonded Epoxy Coating Performance**, Dennis Neal, T. Whitehurst ................................................................. 47
- **Get the Lead Out: What to Do When OSHA Shows Up: Step Two**, L. Skip Vernon ................................................................. 53
- **Concrete Advice: Drying and Measuring Moisture in Concrete; Part 2, Lew Harriman** ................................................................. 55
- **Oil Industry Biocides**, Joe Botvin ................................................................. 65
- **Corrosion in a Phosphate Slurry Pipeline**, B.W. Madson, Stephen D. Cramer, W.K. Collins, S.W. Watson, D. Higdem, W. Perkins ................................................................. 70
- **Managing Galvanic Corrosion**, Arthur H. Tuthill ................................................................. 79

#### Failure Avoidance: Seizure of Bronze Pump Circulating Calcium Chloride Solution, C.E. Price ................................................................. 87

### March (No. 3)

- **Stray-Current Control on Distribution Water Mains Using Diode Microdrainages**, Emer C. Flowanders, Jr., Bons M. Danilayak ................................................................. 17
- **A New Chemical Test Method for Plastics and Elastomers**, John E. Niesse ................................................................. 24
- **Concrete Advice: Carbon Fiber Laminates for Repair of Concrete Structures**, T. Kyle Greenfield ................................................................. 36
- **An Ultrasonic Fouling Monitoring System for Cooling Towers**, Y. Nohata, H. Taguchi ................................................................. 43
- **Bacterial Corrosion of Reformer Heater Tubes**, H. Ghassem, N. Adibi ................................................................. 47
- **Water- and Soil-Side Corrosion of Copper Water Service Lines**, Arthur Cohen, Andrew J. Brock ................................................................. 51
- **Arc Welding Duplex Stainless Steels for Maximum Corrosion Resistance**, T.G. Gooch, R.N. Guinn ................................................................. 58

#### Phorgotten Phenomena: Intergranular Corrosion of Type 316L Stainless Steel, C.P. Dillon ................................................................. 62

### April (No. 4)

- **Pulsed Current Cathodic Protection of Well Casings**, Nguyen N. Bich, Jerry Bauman ................................................................. 17
- **Get the Lead Out: Evaluating Lead Paint Liability Insurance**, M.P. Vink ................................................................. 37
- **Coating Inspector’s Corner: What Is a “Qualified” Coating Inspector?**, Robert Tatcz ................................................................. 39
- **Internal Corrosion Monitoring of Subsea Oil and Gas Production Equipment**, Michael W. Joosten, K.P. Fischer, Roe D. Strommen, Kingsley C. Lunden ................................................................. 44
- **Effect of Crude Oil on Corrosion of Alloys in Severe Sour Environments**, N.G. Galindez Ruiz, Bruce D. Craig ................................................................. 50
- **Erosion Corrosion of Copper- and Nickel-Based Alloys in Polluted Seawater**, J.A. Carew, M. Islam ................................................................. 54

#### Failure Avoidance: Acidic Conditions Cause Concrete Failure, T.S. Thompson, J.F. Seidensticker ................................................................. 60

### May (No. 5)

- **Evaluating the Feasibility of Cathodically Protecting Aboveground Storage Tanks**, Peter Barrien, Ike Solomon ................................................................. 17
- **Some Experiences with Microbiologically Influenced Corrosion of Pipelines**, Daniel H. Pope, E. Alan Morris, III ................................................................. 23
- **Investigation of Anticorrosive Coatings by the Electrochemical Noise Method**, D.J. Mills, G.P. Bierwagen, B. Skerry, D. Tallman ................................................................. 33
- **Coating Inspector’s Corner: Measuring Dry Film Thickness Using Electromagnetic and Eddy Current Gauges**, Tony Cunningham ................................................................. 39
- **Secondary Containment Design for Corrosion Control on Aboveground Storage Tanks**, Thomas E.W.P. Kelly ................................................................. 45
- **Microbiological and Electrochemical Types of Corrosion: Back to Basics**, John G. Stoeker, II ................................................................. 49
- **A New Method for Fast Tank Floor Inspection, Zhongqing You, David Bauer** ................................................................. 55

#### Phorgotten Phenomena: Materials Selection and Design to Minimize Hydrogen Grooving, Stephen K. Brabaker, Robert E. Tatnall ................................................................. 60

©NACE INTERNATIONAL
June (No. 6)
Corrosion and Physical Properties of Microalloyed Rebar, L. Martinez, G. Hernandez-Duque, J.J. Carpio, C. Arganis ................................................................. 14
Stray-Current Interference Control for High-Voltage Direct-Current Earth Currents, John H. Fitzgerald, III, David H. Kroon ................................................. 19
Variables in Measuring Coating Thickness and A Proposed New Method, Dennis Neal ................................................................. 29
Conductometric Determination of Salts on Steel Surfaces, Ake Brede ................................................................. 35
Regional and Microclimatmic Pollution Effects on Atmospheric Corrosion in Prague and Europe, K. Knoufova, J. Vitekova, K. Kreislova ................. 41
Creep Fatigue Failure of a Secondary Reformer Burner Tube, Abdel-Moneem El-Batahgy, Bahaa Zaghbool ................................................................. 49
Failure Avoidance: Duplex Stainless Steel Solves Corrosion Problem in a Loop Reactor, S. Winnik, B.J. Fitzgerald ................................................................. 55

July (No. 7)
Basic Concepts of Induced Alternating Current Voltages on Pipelines, E.L. Kirkpatrick ................................................................. 14
Cathodic Protection on the Information Highway, M.V. Goloby ................................................................. 19
Zinc-55% Aluminum-1.6% Silicon Coating Compared with Zinc Coating, E. Dalledone, M.A. Barbosa, S. Woyniec ................................................................. 24
Get the Lead Out: Worker Training: The Basis for the Need, L. Skip Vernon ................................................................. 29
Coatings Basics: Abrasive Blast Media Additives: A User's Perspective, Lou D. Vincent ................................................................. 31
Environmentally Safe Potable Water Treatments, Bennett P. Bufardi, A.M. Cognetti ................................................................. 36
Segregation Bands, Role in H2S Cracking of Steels, A. Mazur ................................................................. 52
Phogotten Phenomena: Corrosion of Steel by Caustic, C.R. Dillon ................................................................. 55

August (No. 8)
Pulse Generator/Waveform Analyzer Study of Cathodic Protection Pipeto-Soil Potentials, D.W. Waslen, D.A. Diakow ................................................................. 22
Incorrect Cathodic Protection Connection Leads to Rebar Corrosion, E. Proverbio, E. Mejia, Octabio Garcia, E. Traversa ................................................................. 27
Vapor Aluminum Diffused Steels for High-Temperature Corrosion Resistance, G.T. Bayer ................................................................. 34
Coatings Basics: Thickness Affects the Life of the Coating System, Jarom Lichtenstein ................................................................. 39
Get the Lead Out: Considerations in Instituting Worker Training: Part 1—General Worker Training, L. Skip Vernon ................................................................. 41
Hydrogen Attack on Waterwall Tubes in a High-Pressure Boiler, David E. Hendrix ................................................................. 46
Service-Related Failures in Process Piping, H. Thielsch, F.M. Cone ................................................................. 53
Failure Avoidance: Specifying Materials for Heat Exchanger Tubing, J.M.A. Quik, M. Geudeke ................................................................. 57

September (No. 9)
Corrosion Control for the Hanford Site Waste Transfer System, J.H. Haberman ................................................................. 23
Protecting Substructures in Marine Environments, B.L. Martin, Clem A. Firlotte ................................................................. 26
Correlating Accelerated Tests and Outdoor Exposure Tests for Exterior Coating Gloss, A.J. Gzczeberk ................................................................. 32
Get the Lead Out: Considerations in Instituting Worker Training: Part 2—Competent Person Training, L. Skip Vernon ................................................................. 39
Environmental Factors in the Deterioration of Reinforced Concrete, N.G. Thompson, M. Islam, D.R. Lankard, Y. Paul Virmani ................................................................. 43
Environmental Conditions Affecting Transportation Infrastructure, Robert Baboian ................................................................. 48
Designing Corrosion Resistance Into Reinforced Concrete, W.G. Corley ................................................................. 54
Corrosion Resistance of Galvanized Steel in Concrete, K. Thangavel, N.S. Rengaswamy, K. Balakrishnan ................................................................. 59
Ceramic Roof Tiles Degrade in a Marine Environment, A. Pellicano, A. Rivas, S. Simison, S.R. de Sanchez ................................................................. 64

October (No. 10)
Pulsed Rectifier Limitations for Well Casing Cathodic Protection, J. Dabkowski ................................................................. 25
Cathodic Protection Against Crevice Corrosion of High-Alloy Steel in Seawater, W. Baptista, G. Pimenta ................................................................. 29
Evaluating Coating Systems for Long-Term Immersion Service, S.J. Pawel ................................................................. 37
Coatings Basics: Coating Newly Galvanized Steel, Geoff B. Bynnes ................................................................. 44
Get the Lead Out: Lead Standard Recordkeeping: The Tip of an Iceberg, L. Skip Vernon ................................................................. 47
Microbiologically Influenced Corrosion in Potable Water Installations—An Engineering Approach to Developing Countermeasures, W.R. Fischer, D. Wagner, H. Siedlarek ................................................................. 50
Fungal-Induced Corrosion of Wire Rope, Brenda J. Little, R.L. Ray, K. Hart, Patricia A. Wagner ................................................................. 55
Pitting Corrosion of Copper in Cold Potable Water Systems, James R. Myers, Arthur Cohen ................................................................. 60
Effects of Suspended Sand in Seawater on Condenser Materials, J.P. Ault, G.A. Gehring, Jr, Barry C. Syrett ................................................................. 63
Phogotten Phenomena: Composition Affects Stainless Steel's Resistance, C.P. Dillon ................................................................. 68

November (No. 11)
Protecting Reinforced Concrete Using Thermal-Sprayed Titanium Anodes, John E. Bennett, T.J. Shue, G. McGill ................................................................. 23
Maintenance Painting Programs: Savings or Convenience?, C.F. Baudry, Jr, Lou D. Vincent ................................................................. 33
Coatings Basics: Role of the Coating Manufacturer's Representative, Jarom Lichtenstein ................................................................. 37
Get the Lead Out: Record Keeping for OSHA: Compliance Verification on Three Fronts, L. Skip Vernon ................................................................. 39
Cost-Effective Coating with Supercritical Fluid Technology, R.J. Woods, D.C. Bushy ................................................................. 45
Ultrasonic Imaging to Detect Defects in Interstage Cooler Tubing, J. Huffman, J. Brignac ................................................................. 53
Failure Avoidance: LMC of Brazed Stainless Steel Heat Exchanger, Gordon P. Kalленberg ................................................................. 57
## December (No. 12)
- Protecting the Hull of the Admiral, John H. Fitzgerald, III, G. Fromelt, P. VanDuyne
- Silicon-Based Thermal-Sprayed Coatings in Utility Boiler Components, J. Porcayo-Calderon, S. D’Granda, L. Martinez
- Phosphate Corrosion in High-Pressure Boilers, H.M. Herro, A. Banweg

## January (No. 1)
- Prioritizing Maintenance by Integrity Analysis, J.F. Bau
- Underwater Maintenance and Inspection of Cathodic Protection Systems (Cook Inlet, Alaska), J.C. Daley, D. Ingraham
- Rubber Linings—Overview and New Technology, L. Mohra, E.L. Polski, Richard K. Lewis, A. Maury
- Get the Lead Out: Occupational Safety and Health Review Commission, L.A. Whitsett
- Specified Pipe Fittings Susceptible to Sulfide Stress Cracking, Dale R. McIntyre, E.M. Moore, Jr.

## February (No. 2)
- Analysis of Data on a Reinforced Concrete Cathodic Protection System, G.K. Glass
- Get the Lead Out: An Alternative to Removing Lead-Based Paint: Overcoating, L. Skip Vernon
- Microbiologically Influenced Corrosion Damage in a Water Coolant Header for Remote Process Equipment, C.F. Jenkins
- Welding High-Molybdenum Superaustenitic Stainless Steel, T. Ogawa, T. Koseki
- High-Chromium and High-Silicon Cast Irons, A. Reynaud

## March (No. 3)
- Protecting Proton Beam Piping at Fermi Laboratory, John H. Fitzgerald, III
- Non-Sulfate-Reducing Bacteria Sulfidogenic Bacteria in Oilfield Production Facilities, Jean-Louis Crolet, M.F. Magot

## April (No. 4)
- Auger Tension Leg Platform Cathodic Protection System, A.D. Goolsby, J.D. Smith
- Thirty-Year Atmospheric Corrosion Performance of 55% Aluminum-Zinc Alloy Coated Sheet Steel, Herbert E. Townsend, Jr., A.R. Borzillo
- Get the Lead Out: Hydroblasting Permits Safe, Cost-Effective Dam Rehabilitation, G. Lever
- Effects of Flow on Corrosion Inhibitor Performance, J.A. Dougherty, D.W. Stegmann
- Yellow Metal for Sour Service, T. Clark, W. Ingles, C.M. Fowler
- Stress Corrosion Cracking of Duplex Stainless Steel Weldments in Sour Conditions, M. Schofield, R. Bradshaw, R.A. Cottis

## May (No. 5)
- Cathodic Protection of Aboveground Storage Tanks in an Arctic Environment, T. Barletta, R. Bayle, Kevin J. Kennelley
- Evaluation of Galvanic Anodes: Cathodic Protection Design for Double-Bottom Tanks, M.B. Surkein, J. Collins
- Dehumidification—Closed Loop Systems, C.H. Wyatt, A.R. Crowe
- Vacuum Leak Detection for Double Bottom Tanks, T. Hagen, R. Rails
- On-Line Boiler and Condensate Measurements: Conductivity, pH, and Dissolved Oxygen, D.M. Gray
- Thirty Years of Fiberglass Pipe in Oilfield Applications: A Historical Perspective, Kenneth J. Oswald
- Corrosion and Repairs of Ammonium Carbamate Decomposers, Matilde Fernandez de Romero, J.P. Galban

## June (No. 6)
- Computer Modeling Aids Traditional Cathodic Protection Design Methods for Coated Pipelines, R.M. Degerstedt, Kevin J. Kennelley, M.E. Orazem, J.M. Esteban
- Potential Measurement on Cathodically Protected Structures Using an Integrated Salt Bridge and Steel Ring Coupon, S.P. Turnipseed, G. Nekoska
- Zero VOC Coating Technology—Innovative Solutions for Old Problems, R.E. Morgan
- Developing a Cooling Water Inhibitor with Multifunctional Deposit Control Properties, S. Patel, J.J. Nicol
- Remedial Treatment of an Occupied Building Affected by Microbiologically Influenced Corrosion, M. Davies, P.J.R. Scott
- Failure Avoidance: Small Amount of Water Causes Large Corrosion Problem, Thomas F. Degnan
July (No. 7)
Internal Cathodic Protection of Seawater Piping by the RCP Method, R. Johnsen, P.O. Garlant, S. Valen, John M. Drugli ................................................................. 17
Cathodic Protection Current Testing for Large Plant Structures, R.J. Maynard ................................................................. 22
Corrosion Control of Subsea Piping Systems Using Thermal-Sprayed Aluminum Coatings, S.L. Wolfson ................................................................. 32
Get the Lead Out: Technical Specifications Are the Key to Contract Disputes, L. Skip Vernon ................................................................. 38
Case Study: Minimization of Corrosion Using Activated Sodium Bromide in a Medium-Sized Cooling Tower, C. Nalepa, R. Moore, G. Golson, T. Wolfe, Paul R. Packorius ................................................................. 42
A Mechanistic Study of Phosphonocarboxilic Acid for Boiler Deposit Control, K. Chang, S. Patel ................................................................. 48
Development of Corrosion-Resistant Alloys in the Oil and Gas Industry, Peter R. Rhodes ................................................................. 57
Light-Water Reactors: Some Critical Corrosion Issues and Mitigation Strategies, Robin L. Jones ................................................................. 63

August (No. 8)
A Statistical Approach to Designing Mitigation for Induced Alternating Current Voltages on Pipelines, J. Dabkowski ................................................................. 9
Electrochemical Diagnosis and Rehabilitation of Pilings for a Marine Bridge, Oladis Trocónis de Rincón, Matilde Fernandez de Romero, Daniel Contreras, O. Moron, Jesus Ludovic, J. Bravo ................................................................. 14
Climatic Effects on Coatings Application and Cure, D.J. Schnell ................................................................. 25
Get the Lead Out: Status of Regulations Mandated by Title X, L. Skip Vernon ................................................................. 30
Reality Check: Reinspection of Deaerators, R.J. Twig ................................................................. 39
A New Approach to Detect and Identify Hydrocarbon Leaks in Refinery Cooling Systems, C. Surrrell, Andrew M. Harris ................................................................. 46
Review: Sour Service Definitions, Dale R. McIntyre, John K. Boah ................................................................. 54
Corrosion in Oil/Water Systems, Bruce D. Craig ................................................................. 61
CO₂ Stress Corrosion Cracking Failures of Carbon Steel Equipment, K.K. Kirkham ................................................................. 64

September (No. 9)
Cathodic Protection of 32 Steel Tank Reservoir Interiors, Mark Lewis ................................................................. 13
Sacrificial Cathodic Protection of a Concrete Overpass Using Metallized Zinc, Rejean Brousseau, Bruce Baldock, G. Pye, P. Gu ................................................................. 18
Repair of Marine Structures Using an All-Polymer Encapsulation Process, F. Apicella, G. Nickelsen, F. Wang ................................................................. 28
Microbiologically Influenced Corrosion in Wastewater Treatment Plants, J.B. Soebbing, R. Yolo ................................................................. 41
Overcoming Corrosion Concerns in Copper Tube Systems, Arthur Cohen, James R. Myers ................................................................. 53
Repair of Urea Reactors, Matilde Fernandez de Romero, J.A. Albornoz, J.P. Galban ................................................................. 64

October (No. 10)
Offshore Platform Cathodic Protection Retrofits, Stephen P. Turnipseed ................................................................. 11
Reconstructing Pipeline Cathodic Protection in a Wetlands Area, John H. Fitzgerald, III, J. Skubisz, F. Schaefer ................................................................. 17
Elastomeric Waterproofing for Parking Garage Decks, N.P. Mailvaganam ................................................................. 24
Corrosion Control with Induced Tension Wraps, A.E.J. Strange ................................................................. 32
Get the Lead Out: The Many Faces of Lead Law, L. Skip Vernon ................................................................. 36
Microbial Corrosion of Metals Exposed to Air in Tropical Marine Environments, A. Parra, J.J. Carpio, L. Martinez ................................................................. 44
Use of Epoxy Portland Cement Mortars to Repair Reinforced Concrete Structures, Oladis Trocónis de Rincón, A. Rincon, O. Moron, M. Villasmil, R. Fernandez ................................................................. 55
Radiographic Examination of Prestressed Concrete Box girder Bridges, Sridharan Srinivasan, K. Saravanan, V. Kapali, N. Nayak, R. Suresh Bapu, R. Kalyanasundaram, A. Madhavanayandi, Y. Iyer, N.S. Renganswamy ................................................................. 61
Relevance of Laboratory Corrosion Tests, Russell D. Kane ................................................................. 67

November (No. 11)
Statue of Liberty Restoration: Ten Years Later, Robert Baboian, E. Blaine Cliver ................................................................. 5
Corrosion Management, Derek Milliams, Kees van Gelder ................................................................. 13
Future Trends in the Use of Composites for Corrosive Service: A Roundtable Discussion, Larry Craigie, Henry R. Vollmer, Bill Holtclaw, Tom Anderson ................................................................. 17

December (No. 12)
Zinc Mesh Anodes Cast Into Concrete Pile Jackets, Richard J. Kessler, Rodney G. Powers, Ivan R. Lasa ................................................................. 11
DOT’s Perspective on In-Line Inspection, Lloyd W. Ulrich ................................................................. 17
Moisture-Cured, Polyurethane-Based, Surface Tolerant Coatings: An Economical Alternative for Corrosion Control, Juergen Schwindt ................................................................. 25
Growth Model and On-Line Measurement of Pitting Corrosion on Carbon Steel, Akira Iimura, Kuniyuki Takahashi, Takahiko Uchida ................................................................. 39
Corrosion Surveillance for Aircraft, P.R. Roberge, M.A.A. Tullmin, L. Grenier, C. Ringas ................................................................. 50
Atmospheric Corrosion of Stainless Steels Used for the Eaves of Buildings, M. Tochihara, T. Ujiro, Y. Yazawa, S. Satoh ................................................................. 58
Critical Temperatures for Chloride Stress Corrosion Cracking of Type 300 Stainless Steels, C.P. Dillon ................................................................. 65
January (No. 1)
In-Situ Acquisition of Cathodic Protection Parameters, W. Baptista, J.C.M. da Costa ................................................................. 9
Anode Field Cathodic Protection, B. Hatfield ........................................................................................................................................ 15
Comparison of Performance of Field Applied Girth Weld Coatings, Dennis Neal ........................................................................ 20
The Art of Coating Specification Writing, L. Skip Vernon ............................................................................................................ 25
CO Inhibition of Wet CO₂ Corrosion of Carbon Steel, J.W. Slusser, Sheldon W. Dean, Jr, W.R. Watkins ............................................. 40
Spoolable Composite Pipe for Offshore Applications, Seth A. Silverman ..................................................................................... 48
Decreasing Concrete Sewer Pipe Degradation Using Admixtures, J.A. Dackzo, D.A. Johnson, S.L. Amey ......................................... 51
Large-Diameter Piping Examination Using Eddy Current, J.C. Griffith, R.G. Krotke, B.L. Everett ..................................................... 58
Limitations on Use of Pitting Potential Measurements, Michael A. Streicher .............................................................................. 65

February (No. 2)
Zinc-Wired Rebar, X.G. Zhang, J. Hwang .................................................................................................................................. 22
Updated Protective Coating Coats, Products, and Service Life, Gordon H. Brevoort, M.F. MelLampy, K.R. Shields .................... 39
MFL Tool Hardware for Pipeline Inspection, K.K. Tandon ........................................................................................................... 75
Catastrophic Failure of a Waste Heat Boiler, Abdel-Monem El-Batagy ..................................................................................... 81
Flourcarbon Liner Protected with Chemical-Resistant Masonry Solves Tough Corrosion Problem, Dale K. Heffner ................. 85

March (No. 3)
Zinc/Hydrogel System for Cathodic Protection of Reinforced Concrete Structures, Jack Bennett, Clem A. Firlotte .................. 14
Mass Integrity of Aboveground Storage Tanks, R.A. Childs, II .................................................................................................... 21
Corrosion of Painted Pipe Flanges and a Method for It’s Control, Jim N. Britton ............................................................. 27
Get the Lead Out: Lead-Based Paint Inspection: New Opportunities, L. Skip Vernon ............................................................... 34
High-Temperature Microbial Corrosion in the Condenser of a Geothermal Electric Power Unit, R. Torres-Sanchez, A. Magana-Vazquez, J.M. Sanchez-Yanez, L.M. Gomez ................................................................. 43
Corrosion Resistance of a New, Wrought Ni-Cr-Mo Alloy, Paul Crook, M.L. Caruso, D.A. Kingsseed ................................. 49
Some Characteristics of Nickel and Nickel-Based Alloy, C.P. Dillon ......................................................................................... 53
New Ni-Cr-Mo-Alloy (UNS N06059) Solves Costly Corrosion Problem, D.C. Agarwal ............................................................ 56

April (No. 4)
Corrosion Beneath Disbonded Coatings, J.A. Beavers, N.G. Thompson ................................................................. 13
Assessment of Coating Quality in Cathodic Protection and Coatings Systems, Unni Steinsma, John M. Drugl .................... 21
Rubber Linings as Surface Protection in Flue Gas Desulfurization Plants, J. Fenner .......................................................... 33
Development of Auto-Sealing System Using an Electrically Shrinkable Tube Under a Low-Pressure Condition, Yoshihiro Okano, Takao Kitagawa, Norio Shoji, Toshiyuki Namioka, Minoru Komura ................................................................. 40
Polyaspartate Scale Inhibitors—Biodegradable Alternatives to Polyacrylates, Robert J. Ross, Kim C. Low, James E. Shannon 53
Selection of Chemical Products for Oilfield Application in Artic Environments, Daniel E. Powell, Ewout Vander Wende 58
Discussions: Review of Sour Service Definitions, Dale R. McIntyre, John K. Boah; Discussion: L.M. Smith, Jean-Louis Crolet, Svein Eliassen, B. Kermanci, W. Nisber; Reply: Dale R. McIntyre 66
Phorgotten Phenomena: Dissolved Sulfur in Sour Aqueous Environments, C.P. Dillon ........................................................ 72

May (No. 5)
Cathodic Protection of Prestressed Concrete Cylinder Utilizing Zinc Anodes, Risque L. Benedict, Jerald G. Ott, II, David H. Marshall, Dale White ................................................................. 12
Locating Open Joints in Bell and Spigot Type Buried Pipelines, Leon Marianian ........................................................................ 18
Protection of Concrete Structures in Immersion Service from Biological Fouling with Silicone-Based Coatings, Deborah Wiebe, Jim Connor, Garth Dolderer, Ray Riha, Bruce Dyas ................................................................. 26
Corrosion on Aircrafts in Marine-Tropical Environments: A Technical Analysis, A. Alvarez .................................................. 33
Monitoring Requirements for Refinery Cooling System Reuse Water, Paul R. Enckhaus .............................................................. 42
Molten Salt Attack of Alloy 800H and Cast Stainless Steel Superheater Components Resulting from Steam-Side Carryover Deposition, Joseph P. Ribble, Mel J. Eschmacher ......................................................................................... 48

June (No. 6)
Potential Measurements on Integrated Salt Bridge and Steel Coupons, George Nekoksa, Stephen T. Turnipseed .................. 15
Fabrication and Installation of Anodes for Deep-Water Pipelines Cathodic Protection, Svein Eliassen, Nina Holstad Pettersen 20
A Study of Diffusional Zinc and Aluminum- and Zinc-Based Coatings on Steel, Oladis Tocronis de Rincnz, Jesus Ludovic, Ennie Huerta, Nelson Romero, Matilde Fernandez de Romero, G. Orlando Perez, William Campos, Alfredo Navarro .................................................. 28
Myths Related to Microbiologically Influenced Corrosion, Brenda J. Little, Patricia A. Wagner ................................................ 40
Microbiologically Influenced Corrosion of Fe-, Ni-, Cu-, Al-, and Ti-Based Weldments, R.A. Buchanan, A.L. Kovacs, C.D. Lundin, K.K. Khan, J.C. Dunko, P. Angell, Stephen C. Dexter .......................................................... 46
Corrosion Testing of Welds in Austenitic Stainless Steel Tubing Using ASTM A 249 Boiling HCl Weld Decay Test (Supplementary Requirement S7), James J. Pepin, Edward R. Blessman, Paul T. Lovejoy .......................................................... 58
Nitride Embrittlement Failures of Carbon Steel and Low-Alloy Steels, Kim A. Wynn .................................................................................. 62
Microbiologically Influenced Corrosion Causes Failure of Type 304 Water Well Screens, F. Elshawsh, T. Elmendelsi, A. Elhoud, E. Abuan, E. Elagdiel .................................................................................. 66

July (No. 7)

Cathodic Protection Remote Monitoring for a Gas Distribution System, Stanley J. Croll .......................................................... 14
Once Vagrant Current, Now Impressed Current Cathodic Protection, Mark Lewis .......................................................... 18
Clad Piping Components for Refinery Applications, Jonathan D. Dobis, Bhaven Chakravarti .......................................................... 29
Water Reuse in Oil Refineries, William T. Bresnahan .......................................................... 40
Corrosion and Fouling Experiences in Crude Units Using Low Base-Strength Neutralizers, Dannie Clarida, Jim Johnston, Marc McConnell, Rusty Strong .......................................................... 46
Control of Microbiologically Influenced Corrosion in Oil Transmission Pipelines, Joe Boivin .......................................................... 53
Cracking in Liquid Petroleum Gas Horton Spheres, D.K. Trivedi, S.C. Gupta .................................................................................. 59
Corrosion Fatigue Causes Failure of Gas Turbine Combustion Chamber, F. Elshawesh, T. Elmendelsi, A. Elhwaer .................................................................................. 64

August (No. 8)

Electrical Isolation Method Improves Cathodic Protection, Henry N. Tachick .......................................................... 14
Cathodic Protection Requirements at Pipeline Crossings, Michael S. Baker .......................................................... 18
Guide to Soluble Salts Field Testing, James R. Johnson .......................................................... 27
Performance of a New Paper Mill Supply Treatment Program, Stephen M. Kessler, Nhung T. Le .................................................................................. 35
Paracetic Acid: A New Biocide for Industrial Water Applications, Jeffrey F. Kramer .................................................................................. 42
Sensitization and Stabilization of Type 409 Ferritic Stainless Steel, James D. Fritz, Iban A. Fransson .................................................................................. 57
Potential Survey Technique for Prestressed Concrete Pipes, Rejean Brousseau, Nathalie Chagnon, Bruce Baldock .................................................................................. 64

September (No. 9)

Cathodic Protection Retrofit of an Offshore Pipeline, Robert H. Winters, Alan C. Holk .......................................................... 15
Cathodic Prevention and Protection of Concrete Elements at the Sydney Opera House, M. Tettamanti, A. Rossini, Atef Cheaitani .................................................................................. 21
Industrial Lead Abatement: Results of Repainting a Water Main Under a Kansas City, Kansas Bridge, Blake Elliott, Peter Zanoni, Ed Ralle, Brad Fuller .................................................................................. 30
Technical Considerations in the Analysis of Residual Concentrations of Corrosion Inhibitors, Adelina J. Son, Beth S. Mackley .................................................................................. 38
Effects of Ethanolamine, pH Change, and Increased Hydrazine Levels on Deposit-Covered Alloy 600 and Brass Corrosion, Aaron Barkatt, Eva Labuda, Donna M. Wilder, Susan Smialowska, Raul B. Rebak, Galina Chepakhov, Reynolds J. Burns .................................................................................. 48
Novel Downhole Capillary Injection System Solves Difficult Chemical Treatment Problems, Seth A. Silverman, Wilbur Butler, Ted Ashby, Kent Snider .................................................................................. 54
Field Evaluation of Electrochemical Techniques for Assessing Corrosion of Prestressed Concrete Reservoirs, Ronald L. Bianchetti, David Trejo (Erratum, November 1997, p. 68) .................................................................................. 64
Rapid Screening of Stainless Steels for Environmental Cracking, Russel D. Kane, C.J.B.M. Joia, A.L.T. Small, J.A.C. Ponciano .................................................................................. 71

October (No. 10)

Computerized Cathodic Protection Technology Reduces Pipeline Reconditioning Costs, Mark E. Rizzo, Thomas Wildman .................................................................................. 14
Cathodic Protection of Pipelines in Discontinuous Permafrost, C.J. Mitchell, M.D. Wright, D.W. Waslen .................................................................................. 20
Unusual Cathodic Protection Situations with Underground Storage Tanks, John H. Fitzgerald, III .................................................................................. 26
Handling of Sodium Chlorite with Plastics: Development of a Liner for a Rail Car Tanker, L.M. Dobosz, Terry J. Holmes .................................................................................. 34
High-Performance Thermoplastic Lining Techniques, Brian Gardiner .................................................................................. 42
Development of a Standard Test Procedure for Assessment of the Performance of Treatment Programs for Industrial Cooling Water, A. van Haarlem, A.F. van Pelt .................................................................................. 52
A Standard Test Procedure for Industrial Cooling Water Treatment Programs: Another Viewpoint, A.F. Brunn, Jr. .................................................................................. 59
Contractor Guidelines for Preventing Avion Corrosion, Edward Taylor .................................................................................. 66
Cracked Aluminum Hydraulic Line, Larry W. Server, Phillip A. Sherer .................................................................................. 72

November (No. 11)

Investigation of Stray Alternating Current Interference on a Water Pipeline System, Stuart L. Engle .................................................................................. 9
Cathodic Protection Helps Stop Concrete Lining Cracks in Steel-Reinforced Water Pipelines, Manuel Garcia Peris, Miguel Angel Guillen .................................................................................. 17
Recent Developments in Wear- and Corrosion-Resistant Alloys for the Oil Industry, Damodaran Raghu, James B.C. Wu .................................................................................. 27
Antibiofoulants: A Practical Methodology for Control of Corrosion Caused by Sulfate-Reducing Bacteria, Jim A. Billman .................................................................................. 43
Biocide Monitoring Goes High-Tech, Robert J. Karbowski .................................................................................. 49
1997 F.N. Speller Award Paper: Importance of Surface Preparation for Corrosion Control in Nuclear Power Stations, J. Philippe Berge .................................................................................. 56
Effect of Alloying Elements on Stress Corrosion Cracking of Stainless Alloys, Michael A. Streicher .................................................................................. 63
Erratum: Field Evaluation of Electrochemical Techniques for Assessing Corrosion of Prestressed Concrete Reservoirs, Ronald L. Bianchetti, David Trejo (September 1997, page 64) .................................................................................. 68

December (No. 11)

Photovoltaic Cells in Cathodic Protection, Francisco Müller Filho, Luciano Pereira da Silva, Rudy Müller .................................................................................. 12
Analysis of Studies on Cathodic Protection Criteria for Steel in Concrete, Jack Bennett, John P. Broomfield .................................................................................. 16
Thermal Spray Coatings for Corrosion Protection: An Overview, Elliott R. Sampson .................................................................................. 27
Thermal Spray Inspection Methods and Training Requirements, Carol S. Baxter .................................................................................. 31
Prediction of Corrosion Rate for Alloys Exposed to Reducing/Sulfidizing Combustion Gases, S.C. Kang ................................................................. 36
Artificial Marsh Treatment of Nonprocess Water for Reuse in Site Steam Boilers, Robert M. Moore, Steve W. Card ................................................... 42
Choosing a Carbon Steel for Effective CO2 Corrosion Tests in the Laboratory, Andrew J. McMahon ................................................................. 50
Hydrogen Embrittlement of High-Strength Fasteners in Atmospheric Service, David E. Hendrix ................................................................. 54
Failure Avoidance: Liquid Metal Cracking of Pure Copper, Vivekanand Kain, G.B. Kale, P.K. De ................................................................. 57

January (No. 1)

Zinc Sheet Anodes with Conductive Adhesive for Cathodic Protection, Richard J. Kessler, Rodney G. Powers, and Ivan R. Lasa .................................................. 12
Creating a Pipeline Rehabilitation Plan, William F. Marshall ................................................................. 17
An Improved, Rapid Corrosion Rate Measurement Technique for All Process Environments, A.F. Denzine, M.S. Reading .................................................. 35
Corrosion and Corrosion Control Methods in Amine Systems Containing Hydrogen Sulfide, Arthur L. Cummings, Fred C. Yeatch, Alfred E. Keller .................................................. 42
Thermoplastic-Lined Fiber Reinforced Plastic Dual-Laminate Composites for Corrosive Applications, Paul Habib .................................................. 25
Corrosion of Tantalum and Tantalum–2.5% Tungsten in Highly Concentrated Sulfuric Acids, Michael Coscia, Michael H.W. Renner .................................................. 52
Corrosion Failures in Plate Heat Exchangers, R.L. Turissini, T.V. Bruno, E.P. Dahlberg, R.B. Settler .................................................. 59
Phorgotten Phenomena: Corrosion of Stainless Steel by Hot Caustic, C.P. Dillon .................................................. 64

February (No. 2)

Close Interval Potential Surveys—Planning, Execution, Results, R.L. Pawson .................................................. 16
Use of Coupons to Monitor Cathodic Protection of an Underground Pipeline, C. Dan Stears, Oliver C. Moghissi, Lee Bone, III .................................................. 23
Using On-Line Monitoring to Solve Bacteria Corrosion Problems in the Field, John S. Smart, III, Tom Pickthall, Allen Carlile .................................................. 61
Erosion-Resistant Coatings for Fluidized Bed Boilers, N.G. Solomon .................................................. 38
Coating Application and Evaluation for Heavy Wall Thickness, Temperature, and Pressure Pipeline, Valmore Rodriguez, Elias Perozo, Elena Alvarez .................................................. 44
Study of Pipe Cleaning and Magnetic Particle Techniques for Stress Corrosion Cracking Investigation, Pierre Croevolin, Walter Kresic .................................................. 84
Inspection Methodology Designed to Optimize Budgets, R.R. Valbuena, L.C. Kaley, M.L. Wechsler .................................................. 89
Pipeline Rehabilitation by Water-Jetting, Andreas W. Mombaur, A.G. Nielsen .................................................. 97
Failure Avoidance: Weld Spatter Unexpectedly Lowers the Boom, Arun K. Agrawal .................................................. 102

March (No. 3)

Sacrificial Anode Protection of an Underground Steel Reinforced Concrete Structure, Richard J. Kessler, Rodney G. Powers, Ivan R. Lasa .................................................. 10
Internal Pipeline Rehabilitation Using Polyamide Liners, D.B. Lebsack, D. Hawn .................................................. 24
Cryogenic Testing of Protective Coating Systems for a Liquefied Natural Gas Project, S. Narain .................................................. 28
Flow-Influenced Corrosion in a Waste Energy Sparg Line, D.A. Shiffer .................................................. 34
Particulate Interference and Treatment Within a Recirculating Cooling Water System: A Primer, G.J. McGiffney .................................................. 46
Recent Fiberglass-Reinforced Plastics Applications in Gas Cleaning Sections of Sulfuric Acid Plants, S.C. Desai .................................................. 61
Phorgotten Phenomena: Filiform corrosion on Coated Steel, A. Pellicano, S. Simson, J.B. Justo .................................................. 67

April (No. 4)

Cathodic Protection Upgrade of the Cognac Platform, A.D. Goosby, D.P. McGuire .................................................. 13
Impressed-CURRENT Tensioned Anode Strings for Offshore Structures, M.L. Smith, Clark P. Weldon .................................................. 19
Selecting Internal Coatings for Gas Well Tubulars, Russell E. Lewis, David K. Barbin .................................................. 28
Imitating Natural Microbial Fouling Control, W.F. McCoy .................................................. 45
Materials and Corrosion Technology for Deep-Water Oil and Gas Production, Russell D. Kane, S.T. Tebbel, M.S. Cayard, H.R. Hanson .................................................. 54
Phorgotten Phenomena: Temperature Control Essential During Acid Cleaning of Process Equipment, P.J. Morris .................................................. 59

May (No. 5)

Polarization Under Disbonded Coatings: Conventional and Pulsed Cathodic Protection Compared, D.A. Diakow, G.J. Van Boven, M.J. Wilmott .................................................. 17
Chemical and Environmental Influences on Copper/Copper Sulfate Reference Electrode Half-Cell Potential, S.J. Pawel, R.J. Lopez, E. Onduk .................................................. 24
Effect of Inhibitors and Coatings on Rebar Corrosion, H. Saricimen, O.A. Ahsiyra, N.R. Jarrah, A. Qudssia, M. Shameem .................................................. 32
Ultrahigh-Pressure Water Jetting Comes of Age for Surface Preparation, R.F. Schmidt .................................................. 39
Possible Source of a Phosphorus Compound Produced by Sulfate-Reducing Bacteria that Cause Anaerobic Corrosion of Iron, W.P. Verbon .................................................. 46
Electrochemical Aspects of Surface/Solution Interactions in Scale Initiation and Growth, A. Neville, A.P. Morzitz, T. Hodgkiess .................................................. 50
Materials Experience in Methanol Reforming Units, Kenneth L. Baumert, J.J. Hoffman .................................................. 60
Corrosion of a Stainless Steel Hot Water System in a Brewery, J.T. Welz, J.C. Tverberg .................................................. 66
Phorgotten Phenomena: Corrosion of Carbon Steel Under Wet Insulation, D. Reichert .................................................. 73

June (No. 6)

Cathodic Protection for Above-Water Sections of a Steel-Reinforced Concrete Seawater Intake Structure, M. Ali, H.A. Al-Ghannan .................................................. 11
A 3-Layer Polyethylene Coating for Plant Application, J.D. Kellner, A.J. Doheny, Jr., B.B. Patil .......................................................... 28
Experience Report on Coating Concrete Containment Structures in a Power Plant Maintenance Environment, J. Steve Poncio, Willard D. Hall .................................................. 33
Outsourcing Cooling Water Services—Challenges and Opportunities, D.V. Jhate ............................................................................. 41
A Blueprint for Water Quality in South Louisiana: Two Field Case Histories, David K. Barbin, D.W. Synnak .................................................. 46
Compressive and Compressive Shear Strength of Corrosion Protection and Encapsulation Grouts, J.C. Smith, M. Moukwa .................. 54
**Failure Avoidance:** Mercury Liquid Metal Embrittlement Causes Aluminum Plate Heat Exchanger Failure, R.L. Turissini, T.V. Bruno, E.P. Dahlberg, R.B. Setterland .................................................................................. 59
**Failure Avoidance:** Sandelin Effect Causes Severe Corrosion of Carbon Steel Brackets in Molten Zinc Bath, J.J. Cirilli .................................................................................................. 63

**July (No. 7)**

Mixed Cathodic Protection Method for a Corvette-Type Ship, J.M. Bastidas, S.B. Mateo, E.M. Mora ........................................................................ 17
Cost of Impressed Current Cathodic Protection for Coastal Oregon Bridges, G.R. Holcomb, C.B. Cryer .................................................. 22
The Process of Material Specification for Rubber Lining, R.A. Earnest ................................................................................................. 31
Developing a Methodology for Performance Evaluation of Metallic Thermal Spray Coatings for Oil and Gas Industry Service, I. Smuga-Otto, K.E. Sizar ........................................................................... 34
Prevention of Microbiologically Influenced Corrosion in Fire Protection Systems, G.S. McReynolds ................................................ 45
Field Performance of a New Biocide for Biofouling Control in Water Treatment Applications, T.W. Gaffney, C.L. Wiatr .................. 50
Metal Dusting of Nickel-Based Alloys, H.J. Grabke, E.M. Müller-Lorenz, J. Klöwer, D.C. Agarwal .................................................... 58
Properties, Welding Methods, and Petrochemical Applications of Aluminized Steel Tubes and Pipes, R. Ren, Q.R. Ding .................. 65
**Phogotten Phenomena:** Behavior of Reactive Metals, C.P. Dillon .................................................................................................. 69
CORROSION/98 Plenary Lecture: Role of the Corrosion Engineer in the Development and Application of Risk-Based Inspection for Plant Equipment, Richard J. Horvath .................................................................................. 70

**August (No. 8)**

Alternating Current Interference-Related Explosions of Underground Industrial Gas Piping, D.L. Caudill, Kevin C. Garrity .................. 17
Using Coupons and Probes to Determine Cathodic Protection Levels, R.A. Gammow ........................................................................... 24
Advanced Coating Lining Systems for Challenging Chemical Environments, J.M. Braubacher, J.E. Stiles .................................................. 35
Choosing the Correct Monolithic Flooring System, E.J. Wolf .................................................................................................................. 41
Combined Use of Dehumidification and Vapor Corrosion Inhibitors for Plant and Equipment Mothballing or Lay-Up, L. Gelnier 48
Effect of Methylenechloro/Methyleneisothiazolone on Bacterial Respiration in Cooling Water, D.A. Shaw, T.M. Williams, J.W. Holz ........... 54
Gasket Materials and Other Factors Influencing Crevice Corrosion Resistance of Stainless Steel Flanges, Robert M. Kain .................. 62
Technical Note: Connecting Titanium to Other Metals, D. Peacock ....................................................................................................... 68

### January (No. 1)
- **Viewpoint:** Happy Birthday, Materials Performance, John H. Fitzgerald III ........................................................................... 8
- CP for Corroding Reinforcement in Concrete Floor Elements, G. Schuten, J. Leggendoor, R.B. Polder ..................................... 22
- Measuring Unwanted Alternating Current in Pipe, W.H. Swain ............................................................................................. 26
- Measuring Adhesion of Coating to Concrete and Steel, T. Cunningham, J. Steele .................................................................... 34
- Chemical Treatment for a Heavy Crude Oil/Diluent Separation Unit, J.J. Perdomo, M. Ramirez, A. Viloria ............................... 46
- Corrosion Control During Boiler Chemical Cleanings, B. Buecker ......................................................................................... 52
- **Failure Avoidance:** Corrosion of Chlorination Solution Piping, W.D. Brown, A.A. Maccari ....................................................... 66
- **Leaders:** Corrosion Engineer Foresees More Reliable and Economical Systems to Protect the Infrastructure, Paul S. Rothman ...................................................................................... 104

### February (No. 2)
- **Viewpoint:** The Corrosion Doctor, Joe H. Payer ................................................................................................................ 8
- AC Grounding of Cathodically Protected Structures Using Solid-State Decoupling Devices, H. Tachick ................................. 20
- Cathodic Protection of a Biotreatment Tankage Facility, L. Manian, J.W. Hutt .......................................................................... 26
- Coatings for Wineries: Corrosion Protection by Design, G. Amos ............................................................................................. 36
- **Forgotten Phenomena:** The Importance of Wetting a Substrate, L.D. Vincent ................................................................. 40
- Biodegradable Voltatile Corrosion Inhibitors for Offshore and Onshore Installations, C. Chandler ............................................. 48
- Four-Point Probe Technique to Measure the Efficacy of a VCI, P. Jaeger, L.F. Garfias-Mesias, M. Büchler .................................. 54
- **Phorgotten Phenomena:** Rouging—A Discoloration of Stainless Steel Surfaces, R.A. Corbett ..................................................... 64
- **Failure Avoidance:** Liquid Metal Embrittlement of a Steam Dump Condenser, R. Francis, T. Healiss ...................................... 68
- **Leaders:** Corrosion Engineer Sees Increased Need for Applied Research to Solve Everyday Corrosion Problems, Ronald L. Bianchetti ...................................................................................... 168

### March (No. 3)
- **Viewpoint:** “Smart” Corrosion Monitoring, John P. Broomfield ........................................................................................... 8
- NDT Services: Are You Getting What You Need? P. Marks .................................................................................................. 18
- Determining CP Current Requirements for Domestic Water Heaters Using Electrochemical Techniques, A. Saatchi, C. Dehghanian, M. Esfandiari .............................................. 24

MP•LIT INDEX TO MATERIALS PERFORMANCE 85
April (No. 4)

Viewpoint: Offshore Advancements, William H. Hart

Empty Lot Transformed Into Hands-On Training Facility, G.A. Jacobson

Cathodic Protection Monitoring of Subsea Pipelines in the Arctic Ocean, J.P. La Fontaine, T.G. Cowin, J.O. Ennis

Use of Solar Magnesium Anodes in High-Resistance Soil, A. Petreev, K.T. Parker

Splash Zone Protection on Offshore Platforms—A Norwegian Operator’s Experience, R.E. Lye

Good Specifications—The Foundation of a Successful Coating Job, Joram Lichtenstein

Wettability—A Major Factor in Oil and Gas System Corrosion, J.S. Smart III

Failure Avoidance: Brittle Fracture of a Ductile Flange Material, N. Asrar, S.G. Al Sabai, D. Launey

Leaders: Offshore Corrosion Expert Says Biggest Challenge Is Designing Facilities for Required Lifetime, Michael B. Surkein

May (No. 5)

Viewpoint: Teamwork, Training and Technology, Otakar Jonas

CORROSION/2001 Plenary Lecture: The Corrosion Professional’s Role in a Regulated and Litigious Environment, G.F. Rak

Development and Testing of an Improved Pickling Inhibitor Formulation for Hot 20% Sulfuric Acid, M.A. Qaraishi, J. Rawat

Experience with Titanium Heat Exchangers in Refinery Services, D. Fan, W.C. Fort III, R.J. Horvath

Prediction Tools for Sulfidic Corrosion, K. Baker

Leaders: Refinery Corrosion Expert Hopes His Best Accomplishments Are Yet to Come, Richard J. Horvath

June (No. 6)

Viewpoint: Cars and Cathodic Protection, Harold A. Webster

CORROSION/2001 Recap

Embedded Track Rail Boot Electrical Isolation for DC-Powered Rail Transit Systems, E.A. Wetzel

The Impact of Lightning on Rectifier Remote Monitoring Systems, G. Lemire, K. Nicholas

Phorgotten Phenomena: Coating Thickness—Some Things to Consider, J. Lichtenstein

The Corrosion Inhibitor Availability Model, B. Hedges, D. Paisley, R. Woollam

Delayed Fracture of Armament Projectile Bodies, S.C. Kerwin

Failure Avoidance: Creep Failure of Seamless Steel Pipe in a Crude Oil Preheating Furnace, A.A. Sadek

Leaders: Transit Corrosion Control Expert Sees Greater Focus on Electrical Isolation of Rail Systems Tracks, Michael F. Merrick

July (No. 7)

Viewpoint: Waterworks Protection, Jeffrey R. Pimentel

Waste Water: Doing More with Less, M.V. Veazey

Fall Committee/2001 Advance Program

Corrosion of Ductile Iron Pipe: Case Histories, M.J. Szelig, D.M. Simpson

Cathodic Protection Program of the Aurora, Colorado, Water Division, K. Cordova

Bonded Thermoplastic Coating for Ductile Iron Pipe, J.R. Pimentel

The Changing Face of Water Management: A Look to the Future, A.J. Friedman

Case History: Microbiologically Influenced Corrosion in a Wastewater Treatment Plant, S. Basu, J. McAuley, N. While, S. Lamb, P. Pitt

The Performance of Weathering Steel in Sculpture, W.P. Gallagher

Out of the Norm: Tales from a Career in Corrosion Control, Norm Moriber

August (No. 8)

Viewpoint: Moving Forward into 2001/2002, Iba Al-Adel

Cathodic Protection: Looking Back and Moving Forward, M.V. Veazey

AC Mitigation Using Shield Wires and Solid-State Decoupling Devices, H. Tachick

Cathodic Protection Design for 1,900 Miles (3,050 km) of High-Pressure Natural Gas Pipeline, L.E. Carlson, J.H. Fitzgerald III, R. David Webster

Ensuring Corrosion Integrity After 30 Years, L. Oelker

A Composite Sleeve System for Pipeline Repairs, R.C. Porter, E. Quick

Practical Considerations in Establishing Corrosion Monitoring for Upstream Oil and Gas Gathering Systems, D.E. Powell, D.I. Ma’Ruf, I.Y. Rahman

Predicting Corrosion Rates and Future Corrosion Severity from In-Line Inspection Data, G. Desjardins

Out of the Norm: Tales from a Career in Corrosion Control, Norm Moriber

September (No. 9)

Viewpoint: Coating Innovations, L.D. Vincent

NTSB Determines Likely Cause of Pipeline Failure, M.V. Veazey

Practical Telluric Compensation for Pipeline Close-Interval Surveys, T.D. Place, T.O. Sneath

Plasma Advancement Expands Applications of Fluoropolymer Coatings and Linings, G.S. Holdsworth, A.W. Dalgleish

Wax Tapes for Removable, Interim Protection of Large Machined Parts, C.W. Kennedy, F. Rampton

Leaders: Corrosion Engineer Values Strong Teamwork as a Priceless Commodity in Research, J. Peter Ault
October (No. 10)

**Viewpoint:** Banning TBT-Based Paints, Johnny Eliasson ................................................................. 8

U.S. Offshore Industry Awaits FPSO Decision, M.V. Veazey ................................................................. 18

**Failure Avoidance:** Failure of Shoreline Tower Guy Anchor Rods, M.H. El-Sayed, B. Zaghloul ........... 24

Inspection and Repair of Lake Maracaibo Bridge Suspension Cables, O. De Rincón, D. Contreras, M. Sánchez, J. Padilla, C. Lasarte, A. Sarcos, H. García, A. Navarro ................................................................. 34

Polyurea Coatings for Offshore Oil Rigs in the Gulf of Mexico, T. Kenworthy ....................................... 40

Pipeline Corrosion Under Wet Gas Conditions, Y.H. Sun, T. Hong, W.P. Jepson ................................. 48

Premature Failure of MEA Pump Impellers in a Desalination Plant, A.U. Malik, T.L. Prakash, S. Ahmad ................................................................. 56

High-Strength Corrosion-Resistant Alloy for Seawater Fastener Service, E.L. Hibner, L.E. Shoemaker ................................. 60

**Out of the Norm:** Tales from a Career in Corrosion Control, Norm Moriber ......................................... 96

November (No. 11)

**Viewpoint:** Nails Needed, Orin Hollander .......................................................................................... 6

Nuclear Waste Storage Plan Under Review, M.V. Veazey ................................................................. 14

CORROSION/2002 Advance Program ................................................................................................. A1

How to get Published in 2002 MP ........................................................................................................... 54

Annual Education Supplement .............................................................................................................. 56

Electrical Grounding and Cathodic Protection Issues in Large Generating Stations, E.L. Kirkpatrick .... 17

Cathodic Protection of Complex Underground Structures at Power Plants, J. Lichtenstein ................................. 20

Corrosion Protection for Bolting in Marine Environments, K. Stevens, K. Daniel Efird ......................... 28

Water Treatment and Corrosion in Heat Recovery Steam Generators, J.J. Cotton ............................... 36

**Failure Avoidance:** Erosion-Corrosion of Evaporator Coils in a Fluidized Bed Boiler, S.K. Ghosal, P.K. De ........................................................................................................... 42

Microbiologically Influenced Corrosion in a Geothermal Electric Power Plant, R. Torres-Sanchez, M.C. Gonzalez, H. Martinez, L. Martinez-Gomez ................................................................. 46

**Out of the Norm:** Tales from a Career in Corrosion Control, Norm Moriber ......................................... 80

December (No. 12)

**Viewpoint:** The Importance of Specifications, Joram Lichtenstein .......................................................... 8

New Pipeline Integrity Rules: Frequently Asked Questions, M.V. Veazey .................................................... 18

2001 MP Index ....................................................................................................................................... 74

Cathodic Protection of Steel-Reinforced Concrete Structures—Results from 15 years’ Experience, J. Meitz, J. Fischer, B. Isecke ........................................................................................................... 22

Polyurea Coating—Technology and Uses, J. Henningsen ..................................................................... 34

Corrosion and Water Chemistry Problems in Steam Systems—Root Causes and Solutions, O. Jonas ................................. 42

Corrosion of Low-Carbon Steel in Concentrated Urea-Ammonium Nitrate Fertilizer Solutions, O. Hollander ....................................................................................................................................... 54

Long-Term Leak Monitoring of Two Large Process Vessels, S.H. Barber, W.S. Sachs, W.J. Salot ................................. 60

**Out of the Norm:** Tales from a Career in Corrosion Control, Norm Moriber ......................................... 80

January (No. 1)

**Viewpoint:** Cathodic Protection—A Legacy, John H. Fitzgerald III, FNACE ........................................ 8

Fourth Annual NACE Salary Survey Reveals Mixed Results, M.V. Veazey .................................................... 18

The 100-mV Depolarization Criterion for Zinc Ribbon Anodes on Externally Coated Tank Bottoms, M.A. Al-Arfaj ........................................................................................................... 22

A Review of Soil Resistivity Measurements for Grounding, Corrosion Assessment, and Cathodic Protection, R.C. Benson ........................................................................................................... 28

Cathodic Protection of Steel-Frame Buildings, J.P. Drewett .................................................................... 36

Optimal Fire Tests of Protective Coatings, E. Romm, V. Karchevsky, and Oleg Figovsky ................................. 44

Electrochemical Chloride Extraction for Reinforced Concrete Structures, J.P. Broomfield ................................. 52

**Failure Avoidance:** Fatigue Failure of Rail Wheels and Mechanical Behavior of Wheel Steels, Z.X. Liu and H.C. Gu ....................................................................................................................................... 58

**Corrosion Basics:** Cathodic Protection Principles ............................................................................... 66

February (No. 2)

**Viewpoint:** Pulp and Paper Mill Corrosion, Gilbert Rogers ................................................................. 8

Effluent Treatment System Corrosion Control in Pulp Mills, M.V. Veazey .................................................... 18

Anodic Protection of White and Green Kraft Liquor Tankage, Part I: Electrochemistry of Kraft Liquors, J.J. Manro ....................................................................................................................................... 22

**Phorgotten Phenomena:** Inorganic Zinks—How Do They Cure?, L.D. Vincent ........................................... 32

Development and Testing of Organic Inhibitors for Industrial Cleaning Applications, M.A. Quraishi and D. Jamal ....................................................................................................................................... 38

Corrosion Management in Cooling Water Systems, M. Valliapan ................................................................ 42

**Special Report:** Corrosion-Resistant Alloys Used in Modern Pulp and Paper Mills, A.H. Tuthill ................................. 50

Behavior of Stainless Steel in Gulf of Mexico Seawater, N. Acuna, M. Schorr, B. Aubert, J. Flores, and G. Hernandez-Duque ....................................................................................................................................... 58

**Corrosion Basics:** Types of Corrosion ................................................................................................. 67
April (No. 4)

**Viewpoint:** Corrosion-Monitoring Technology, J.P. Ault .............................................................. 8

'Charter of Freedom' Receive Enhanced Protection, M.V. Veazey .................................................. 16

Testing and Monitoring of AC Mitigation and Cathodic Protection on Pipelines in Joint-Facility Corridors, R.E. Allen .......................................................... 20

Inspection of Hot-Dip Galvanized Articles, T.J. Langill .................................................................. 28

**Phorgotten Phenomena:** The Evolution of Surface-Tolerant Coatings, J. Lichtenstein .............................. 34

MIC of Storage Tank Aluminum Floating Roofs During Hydrotest, J. Starovetsky, R. Armon, A. Grysman, and D. Starovetsky ...................................................... 50

**Failure Avoidance:** Creep Failure of Type 310 Austenitic Stainless Steel Bolts, F. Elshawesh, A. Elhoud, and E. Elagdel ................................................................. 56

**Corrosion Basics:** Coatings and Linings .................................................................................... 62

May (No. 5)

**Viewpoint:** Using Qualified Personnel, J. Lichtenstein ................................................................ 8

Phantom Chlorides Create Real Problems for Refiners, M.V. Veazey ........................................... 16

Cathodic Protection in Refineries, Chemical Plants, and Similar Complex Facilities, R.A. Castillo .............................................. 20

Surface Preparation Standards, L.D. Vincent .................................................................................. 28

Remaining Life Assessment of Catalytic Reforming Reactors, G.P. Kallenberg and T. Munsterma ...... 40

**Failure Analysis:** Intergranular Corrosion of Tubes in a Dichloroethane Cracking Decomposition Furnace, J.C. Li, M. Zhao, and Q. Liang .................................................. 50

**Failure Avoidance:** Failure Analysis of Bag Filters, V.S. Raja and D.D. Nage ............................ 54

**Corrosion Basics:** Creep Fatigue .................................................................................................. 64

June (No. 6)

**Viewpoint:** Standards, Specifications, and Common Processes, J.L. Didas ..................................... 8

Managing Pipeline System Integrity, P.H. Vieth .............................................................................. 16

Pipeline Integrity Management and Corrosion Control, E.W. Klechka ............................................ 24

The Problem of Corrosion Under Thermal Insulation, T. Bovard .................................................. 34

**Phorgotten Phenomena:** Solids Concentration in Coating Materials, J. Lichtenstein .................. 40

Development of a Corrosion Inhibitor for Low-Carbon Steel in Concentrated Solutions of Urea-Ammonium Nitrate Fertilizers, O. Hollander, G.E. Geiger ................................. 50

MIC Failure of 304L Stainless Steel Piping Left Stagnant After Hydrotesting, S.W. Borenstein and P.B. Lindsay ......................................................................................... 70

**Corrosion Basics:** Hydrogen Damage ......................................................................................... 77

July (No. 7)

**Viewpoint:** Underground Water Utilities—Crowded and Complex, S. Greenberger ................. 8

Corrosion Considerations for Ductile Iron Pipe, B. Spickelmire ..................................................... 16

**Case History:** Avoiding Sewer Replacement Through Rehabilitation, S.H. Gehler, R.J. Detwiler, R. Price ................................................................................................ 32

**Phorgotten Phenomena:** Corrosion Control in Drinking Water Plumbing—Reminiscences of a Water Treatment Specialist, T. DeVito ......................................................... 42

Improving Prestressing Wire Reliability in Prestressed Concrete Cylinder Pipe, R.O. Lewis ..................... 48

Acoustic Monitoring of a Prestressed Concrete Tank, M. Lewis ....................................................... 56

**Corrosion Basics:** Coatings for Concrete and Concrete Pipe .................................................... 66

Fall Committee Week/2002 Advance Program ............................................................................. 71

CORROSION/2002 Recap ................................................................................................................. 76

August (No. 8)

**Viewpoint:** Integrity is Good Business, L.J. Moore ........................................................................ 8

Green Corrosion Inhibitors Come of Age, M.V. Veazey .................................................................... 16

Conflict Between Copper Grounding and CP in Oil & Gas Production Facilities, E.L. Kirkpatrick ........ 22

Case Study: Program Addresses Internal Corrosion Threats in a Wet, Sour Gas-Gathering System, D.J. Richardson ......................................................................................... 38

Microbiologically Influenced Corrosion by Citrobacter in Sour Gas Pipelines, C. Angeles-Ch, J.L. Mora-Mendoza, R. Garcia-Esquivel, A.A. Padilla-Viveros, R. Perez, O. Flores, and L. Martinez .......................................................... 50

Corrosion Product Analysis—A Road Map to Corrosion in Oil and Gas Production, B. Craig, FNACE ........................................................................................................... 56

### April 2010 (No. 4)

**Viewpoint:** Identifying Opportunities to Support Corrosion Mitigation Legislation, Jeff Rog ................................................................. 10  
**The Essential Fellow, Roger Francis, NACE** ........................................... 12  
**Ionic Model Troubleshoots a ‘Perfect Storm’ of Corrosion Mechanisms, Kathy Riggs Larsen** ................................................................. 30  
**Impressed Current Anode Backfill Performance—Part 1, Joseph F. Tatum, Jr.** ................................................................. 34  
**Myths About Salts, Chlorides, and Coatings, Thomas Swan** ................ 40  
**Aboveground Techniques for Monitoring External Pipeline Coatings, Sankara Papavinasam, FNACE, Michael Attard, and R. Winston Revie, FNACE** 44  
**Essential Oils as VCs for Mild Steel in Various Environments, N. Poongothai, T. Ramachanderen, S.C. Murugavel, and M. Natesan** 50  
**Case History: Metallurgical Examination of Defects in Duplex Stainless Steel Pipe Fittings, Sudhakar Mahajanam, Herman Rincon, and Dale McIntyre** 56  
**Case History: Polythionic Acid Corrosion in Refinery Hydroprocessors, Jaya Rawat, P.V.C. Rao, N.D. Raut, and N.V. Choudary** 62  
**Corrosion Basics: Inhibitors for Waters of Low to Moderate Salt Concentrations** 80  

### May 2010 (No. 5)

**Viewpoint:** A successful CORROSION 2010, Delmar J. Doyle ................................................................. 10  
**Historic Battleship is Fortified Against Corrosion for Decades to Come, Kathy Riggs Larsen** ................................................................. 26  
**Managing Pipeline Integrity by Mitigating Alternating Current Interference, L. Bortels, J. Parlongue, Wolfgang Fieltsch, and Sorin M. Segall** 32  
**Impressed Current Anode Backfill Performance—Part 2, Joseph F. Tatum, Jr.** ................................................................. 38  
**Impact of Tank Construction on Corrosion of Ship Ballast Tanks, Kris De Baere, Helen Verstraelen, Raf Dewil, Lucien Lemmens, Silvia Lenaerts, Tharcisse Nkunzimana, and Geert Potters** 48  
**Ask the Coatings Experts: Understanding Epoxies and Where to Use Them, L.D. “Lou” Vincent** 56  
**Testing of Fiberglass Pipe After 20 Years of Service in a Harsh Oilfield Environment, Kimberly Paggioli** 64  
**Corrosion Basics: Materials Selection** 88  

### June 2010 (No. 6)

**Panelists Discuss Challenges in Sustaining the Nation’s Aging Infrastructure** 24  
**CORROSION 2010 Plenary Lecture: The Development of Corrosion Standards, Sheldon W. Dean, Jr, FNACE** ................................................................. 30  
**Laboratory Investigation of Activated Mortar, Li Yan, Cai Yuebo, Ge Yan, and Zhi Xichang** ................................................................. 36  
**Corrosion of Electroless Ni-P Coating in Simulated Seawater, ShuaiXia Liu, ShiChen Wang, and ZhiLiang Chen** ................................................................. 46  
**Creating an Asset Corrosion Management Strategy Document, Ali Morshed** 56  
**Case History: Corrosion of Allyl Chloride Units in an Epichlorohydrin Production Process, Lingling Wang, Huijuan Chen, and Wenguan Huang** 62  
**Failure Analysis of a 14-in Diameter Oil Pipeline, S.K. Srivastava, Bipin Kumar, and M.V. Katarki** 64  
**CORROSION 2010 Conference Recap** ................................................................. 71  
**Corrosion Basics: Open Recirculated Cooling Water Systems** 96  

### July 2010 (No. 7)

**2010 MP Buyers Guide Results of the 2010 NACE International Corrosion Career Survey** ................................................................. 128  
**Universities and Colleges Offering Corrosion Studies** ................................................................. 136  

### August 2010 (No. 8)

**The Essential Fellow: John P. Broomfield, FNACE** ................................................................. 14  
**Managing Deepwater Corrosion, Kathy Riggs Larsen** ................................................................. 26  
**Determining Earth Potentials at Locations Remote from Impressed Current Anode Groundbeds, R.P. Nagar** ................................................................. 32  
**Accelerated Weathering of Pipeline Coatings to Determine Dielectric Strength, Buddhadeb Dauri** ................................................................. 38  
**Ask the Coatings Experts: Fluoropolymers, Polysiloxanes, and Polyurethanes, L.D. “Lou” Vincent** 42  
**Using Nanomagnetic Fluid for Corrosion Inhibition of Mild Steel, Smita Jauhari, Kinnari Parekh, K.B. Pai, and B.V. Upadhyaya** ................................................................. 54  
**Atmospheric Corrosion Performance of Engineering Materials in India, M. Natesan, S. Murugavelan, and N. Palaniswamy** ................................................................. 60  
**Failure Analysis of High-Strength Low-Alloy Oil Well Tubing Couplings, Peng-bin Yuan, Sheng-wu Guo, and Shuan-lu Lv** ................................................................. 68  
**Corrosion Basics: Materials in High Temperatures** ................................................................. 88  

### September 2010 (No. 9)

**Viewpoint: NACE International Names Robert H. Chalker as the New Executive Director** ................................................................. 10  
**Australian Container Dock Protected by Novel ICCP System, Kathy Riggs Larsen** ................................................................. 24  
**Cathodic Protection for Steel Tubular Piles of an Oil Wharf in Pakistan, Zhu Xichang, Ge Yan, and Li Yan** ................................................................. 28  
**Testing Coatings for Oil Separator Tanks at an Offshore Platform, Neusvaldo Lira de Almeida, Adriano Garcia Bernal, Victor Solymosy, Flavio Augusto S. Serra, and Joaquim Pereira Quintela** ................................................................. 36  
**Evaluation of DBU as a Corrosion Inhibitor for a Pressurized Water Reactor, Haritha Namduri and Seifollah Nasrabadani** ................................................................. 48  
**Corrosion of Civil War Era Sub Marine Explorer—Part 1, Donald L. Johnson, James D. Carr, Brent M. Wilson, Larry E. Murphy, and James P. Delgado** ................................................................. 56  
**Corrosion of Naval Aluminum in Seawater, A. Eliezer, J. Haddad, A. Garcia, B. Valdez, and M. Schorr** ................................................................. 62  
**Corrosion Basics: Atmospheric Corrosion of Iron and Steel** ................................................................. 88  

### October 2010 (No. 10)

**CORROSION 2010 Advance Program** ................................................................. A1  
**Database-Driven Coatings Management Keeps Kennedy Space Center Ready to Launch, Kathy Riggs Larsen** ................................................................. 22  
**Case History: Disbonded Coating Leads to Pipeline Corrosion, Javed Iqbal Waheed** ................................................................. 26
Dehumidification and Ventilation in Surface Preparation and Coating Application, Dan Savage .............................................. 32
A New Three-Layer Polypropylene Offshore Field-Joint Coating, Meghan Mallozzi and Mario Perez ........................................... 36
Measuring Surface Salts: Conductivity vs. Ion Specific Testing, H. Peters ............................................................................. 42
Corrosion of Civil War Era Sub Marine Explorer—Part 2, Donald L. Johnson, James D. Carr, Brent M. Wilson, Larry E. Murphy, and James P. Delgado 50
Corrosion Basics: Coating Condition Surveys .................................................. 72

November 2010 (No. 11)

Viewpoint: Going Global—Our Journey Continues, Chris M. Fowler ..................................................................................... 10
Modern Corrosion Control Adds More Life to 83-Year-Old Bridge, Kathy Riggs Larsen .............................................................. 10
Internal Cathodic Protection of Formation Water Pipelines, Simone L.D.C. Brasil, José Claudio F. Telles, José Antonio F. Santiago, Leandro B.S. Marques, Wilson G. Castinheiras, Jr, João Paulo K. Gervásio, and Lincoln C. Vidal ............................................................... 32
Fiber-Reinforced Zinc Silicate Coatings, Mads Juhl and Lars Pedersen .................................................................................. 42
Case History: Performance of Composite Piping in Concentrated Sulfuric Acid, Richard Heidinger and Brad Francis ......................................................... 50
Construction of a Three-Component Composite Repair, Osmay Oharriz ............................................................................. 54
Corrosion Basics: Coating Concrete .......................................................... 72

December 2010 (No. 12)

Viewpoint: Defining Success: A Thriving and Well-Served Membership, Robert H. Chalker ....................................................... 10
The Essential Fellow: Bernie S. Covino Jr, FNACE ..................................................................................................................... 14
Cathodic Protection Field Resurrected at NACE International, W Brian Holtsbaum ......................................................... 28
Phorgotten Phenomena: Internal Corrosion from Galvanic Anode Cathodic Interference, John H. Fitzgerald, III, FNACE .......................................................... 34
Corrosion Inhibitors for Rebar in Concrete—Part 1, L.D. Stephenson, Debbie Lawrence, and Ashok Kumar, FNACE .............................................................. 38
Repair of a Fiberglass-Reinforced Plastic HCl Storage Tank, Terry W. Cowley and Duane W. Poland ......................................................... 56
Case History: Performance Review of Composites in Plant Applications, A.M. Saleem ........................................................................ 60
The Influence of pH on Type 316L Stainless Steel in Simulated Circulating Cooling Water, Zuojia Liu, Xuesun Cheng, and Xiaogang Li ................................................. 64
Corrosion Basics: Water and Steam Scaling Indices in Power Plants .................................................................................. 96

January 2011 (No. 1)

Ohio University’s Research Facility Tackles Industry’s Corrosion Challenges, Kathy Riggs Larsen .............................................................. 10
Stray Current Delamination of an Organic Coating on Metallic Structures, Cao Alin, Zhang Shengtuo, Zhu Qingjun, and Hou Baorong ......................................................... 24
Use of Digital Photomicroscopy in Paint Analysis—Part 1, Perry Kilpatrick ........................................................................ 29
Corrosion Inhibitors for Rebar in Concrete—Part 2, L.D. Stephenson, Debbie Lawrence, and Ashok Kumar, FNACE .............................................................. 36
Effect of Phosphorated Compounds on Carbon Steel in Eutrophic Fresh Waters, Li Jiang, Xuhui Mao, An Lin, and Fuxing Gan ......................................................... 44
Asset Corrosion Management Contracts: Issues and Improvements, Ali Morshed ........................................................................ 56
Risk-Based Inspection for Aboveground, Fiberglass-Reinforced Polymer Storage Tanks, Eileen Chant and J. Robert Sims .............................................................. 60
Corrosion Basics: Stress Corrosion Cracking .................................................................................. 80

February 2011 (No. 2)

Viewpoint: A Year of International Expansion for NACE, Chris M. Fowler .................................................................................. 10
Accelerated Study of Zinc Mesh Anodes for Reinforced Concrete Structures, Ge Yan, Li Yan, and Zhu Xichang .............................................................. 26
Performance Comparison of Thermal-Sprayed Coatings for Ductile Iron Pipe, Ahmet Gulec, Ozgur Cevher, Fatih Ustel, Ahmet Turk, Akin Akinici, and Fevzi Yetilmaz .............................................................. 30
Use of Digital Photomicroscopy in Paint Analysis—Part 2, Perry Kilpatrick ........................................................................ 38
Phorgotten Phenomena: Unusual Cases of Water System Corrosion, John H. Fitzgerald III, FNACE .............................................................. 46
Measuring Water Well Corrosion Rate In Situ Using LRP Technique, Almeraya Calderón Fucando, Victor M. Orozco Carmona, Gaona Tiburcio Citalli, Borunda Terrazas Adón, Estupiñán Lopez Francisco, and Martínez Villafañe Alberto .............................................................. 48
CORROSION 2011 Program Preview .................................................................................. 53
NACE International 2011 Award Recipients .................................................................................. 64
Corrosion Basics: Acrylic Coatings .................................................................................. 160

March 2011 (No. 3)

Viewpoint: Building on Success for a Sustainable Future, Oliver C. Moghissi ........................................................................ 10
Monitoring System Protects Copenhagen Metro with Early Warnings of Corrosion, Kathy Riggs Larsen .............................................................. 26
Improvements to the External Corrosion Direct Assessment Process—Part 1, David H. Kroom, Olagoke Olabisi, Larry G. Rankin, James T. Carroll, Dale D. Lindemuth, and Marlene L. Miller .............................................................. 26
Phorgotten Phenomena: The Good Old Days? Punch Cards! Mark Lewis ........................................................................ 36
Use of Digital Photomicroscopy in Paint Analysis—Part 3, Perry Kilpatrick ........................................................................ 44
Applications for Biodegradable Vapor Phase Corrosion Inhibitors, Margarita Kharshan and Cliff Cracauer .............................................................. 56
Metal Dusting of Centrifugally Cast Superalloys, Abdulaziz Al-Meshari and John Little .............................................................. 62
Effect of a Pesticide on Corrosion of Carbon Steel in Freshwater, Li Jiang, Xuhui Mao, and Fuxing Gan .............................................................. 68
Corrosion Basics: Testing Protective Coatings ........................................................................ 88
April 2011 (No. 4)

**Viewpoint:** Rebuilding Infrastructure Through Better Decisions, Daniel J. Dunmire .......................................................... 10

Corrosion Under Insulation—The Hidden Threat to Piping and Equipment Integrity, Kathy Riggs Larsen ............................................. 24

Redefining Antifouling Coating Technology—Part 1, Diego Meseguer Yebra and Pere Català............................................................... 42

The Role of Water Chemistry in Preventing Silica Fouling in Industrial Water Systems, Z. Anjnad and R.W. Zuhl ........................................... 54

Construction Materials for Acid Gas Pipelines and Injection Wells, S. Bhat, Bipin Kumar, Dipanka Batsnya, and M.V. Katarki .............................................................................................................. 62

Review of Caustic Soda Service Chart for Carbon Steel, Avtandil Khalil Baitramo ........................................................................... 68

Temperature Effect on Hydrogen Permeation of X56 Steel, Chuanbo Zheng and Guo Yi .......................................................................... 72

**Corrosion Basics:** High-Temperature Corrosion ......................................................................................................................... 88

May 2011 (No. 5)

**Viewpoint:** Growth in Industry Drives Successful CORROSION 2011, Bob Chalker ................................................................... 26

How Will the Japanese Nuclear Power Plant Disaster Affect the Nuclear Renaissance? Kathy Riggs Larsen .................................................. 8

Applications for Battery-Powered CP Remote Monitoring, Craig Held .................................................................................................. 33

Redefining Antifouling Coating Technology—Part 2, Diego Meseguer Yebra and Pere Català............................................................... 40

**Failure Analysis:** Failure of a 6-in Pipeline from Group Gathering Station to Central Tank Farm, S. Bhat, Bipin Kumar, S.B. Prasad, and M.V. Katarki ........................................................................................................ 0

**Failure Analysis:** Microstructural Analysis of Ethylene Furnace Steel Alloy Tubes, C.A. Lot .................................................................... 8

**Case History:** Results of Corrosion Management Applications, All Morshe .......................................................................................... 6

May 2012 (No. 5)

Prototype Floating Wind Turbine Platform Debuts in the Atlantic Ocean, Kathy Riggs Larsen ...................................................... 26

Successful Implementation of ECDA Methodology, Ahmed Jawad Khan ...................................................................................... 2

Installing a Deep Anode CP Grounded in a Marsh Environment, James Fairchild and Spencer Turpin III ........................................... 36

Interpretation of Indirect Inspection Data in the ECDSA Process, Sorin M. Segall, Robert A. Gummow, and John Shore ................. 45

Materials and Corrosion Control in Desalination Plants, M. Schorr, B. Valdez, J. Ocampo, A. So, and A. Eliezer ......................... 56

Supporting Corrosion Management with Forensic Engineering, Richard B. Eckert, Lynsay A. Bensman, and Steven J. Weichel ...... 62

Failure Analysis: Internal Corrosion Rupture of a 6-in Gas Line, A. Elhoud, F. Jewilli, K. Abouswa, and O. Ragaei ......................... 70

Corrosion Basics: Corrosion Surveys .................................................. 96

June 2012 (No. 6)

Knowledge Transfer from Experienced to Novice Engineers, Harvey P. Hack, FNACE ................................................................. 26

Investigation of Corrosion Mechanisms and Control for Encased Ductile Iron Pipe, Julie Bell, Cliff Moore, Leo Solis, and Graham Bell .......... 34

Extending the Life of Iron Pipe in Corrosive Soils, Daniel Crabtree, Susan Grant, Jim Lapladder, and Mark Raffenberg ............. 40

Fifty-Year Corrosion Control History of Polyethylene-Encased Iron Pipelines, Allen H. Cox ............................................................. 46

Long-Life, Low-Maintenance Coating Systems, Ole Oystein Knudsen, Astrid Bjorgum, and Line Teigen-Dussland ....................... 54

VCI Technology in Chloride-Containing Electrolytes at Elevated Temperatures, Margarita Kharsan, Alla Farman, Ramses Garcia Inzunza, Josh Hicks, and Anna Vignetti ......................................................... 66

Phorgotten Phenomena: Razor Blades and the Cost of Corrosion, R. Bhaskaran and N.S. Rengaswamy .............................................. 74

Corrosion Basics: Evaluation of Polymeric Materials .................................................................................................................. 104

July 2012 (No. 7)

2012 MP Buyers Guide NACE International’s Annual Corrosion Career Survey Results for 2012 ................................................................. 182

August 2012 (No. 8)

Mitigating Coating Failures in Trenchless Pipeline Construction, Kathy Riggs Larsen ................................................................. 24

Comparison of Corrosion Attack on Tank Bottoms With and Without Cathodic Protection, I.Y. Barnawi ............................................... 31

Hybrid Communications Network Technology for Pipeline Monitoring, Craig Held ................................................................. 36

Amine Blush Testing—Part 1, Melissa Tischsercher .................................................................................................................. 44

A Methodology for Risk-Ranking Pipelines for Susceptibility to Corrosion, Michael F. McDonald .................................................... 56

Failure Analysis: Initial Corrosion Products Protect a Pipeline from Microbiologically Generated H.S, Daniel Powell, Dale Fincher, Raymond Gonzales, Burkin Melcanon, Robert H. Winters, Brad Rodrigue, and Elliot Brown ......................................................... 66

Failure Analysis of Double Shoulder Tool Joint Fracture, Shuan-lu Lv, Xue-qing Teng, Jie Zhou, Cheng-xin Yang, Ning Li, Qiang Lu, Qiang Zu, Ju-liang Xie, Fang-ting Hu, Jia-let Chen, Guo-zheng Zhang, and Chun-yan Zhang ................................................................. 72

Corrosion Basics: Corrosion in Liquid Metals .................................................. 96

September 2012 (No. 9)

NASA Launches Study of Corrosion Exposure Testing, Kathy Riggs Larsen ................................................................. 28

Cathodic Protection of Steel Pipe Piles in an Open Sea Environment, Y. Miyata and Y. Akira .......................................................... 34

2012 (Vol. 51) MP-LIT INDEX TO MATERIALS PERFORMANCE Amine Blush Testing—Part 2, Melissa Tischsercher ....................... 45

Coating Performance in Duluth Superior Harbor—Part 1, Richard L. Ray and Brenda J. Little, FNACE ................................................. 48

Corrosion Analysis of a Steel Drinking Water Pipe in an Indoor Environment, Lingling Wang, Xue Liu, Linxia Fang, Zhiwei Wu, and Huijuan Che .................................................. 66

Aluminum Oxide Nanoparticles in Cement Mortar, Mohammad Reza Arfiand Zohair Sarajian ............................................................. 66

Corrosion Basics: Protecting Fixed Structures in Seawater ................................................................................................................ 96

October 2012 (No. 10)

Corrosion 2013 Advance Program .................................................................................................................................................. A1

Challenges in Managing the Maintenance of Protective Coatings on Critical Assets, Kathy Riggs Larsen .......................................... 20

Corrosion Protection for the Steel Gates of a Regulation Sluice, Zhu Xichang, Ge Yan, and Li Yan ................................................. 26

Coating Performance in Duluth Superior Harbor—Part 2, Richard L. Ray and Brenda J. Little, FNACE .................................................. 32

Wear Performance of Electroplated Nanocrystalline Ni-P Alloy Coatings, Navef M. Alani, Haitham K. Aljuhani, and Abdelmoumam M. Sherik ......................................................... 36

Locating Disbonded Coatings with EMAT Technology—Part 1, Richard Norsworthy, Jörg Grillenberger, Matthias Jurgk, and Carsten Heinks ......................................................... 40

Gypsum Scale Inhibition Using Biopolymers and Synthetic Polymers, Zahid Amjad ................................................................. 48

Corrosion in Steel Decks Caused by the Environment and Inadequate Construction, P. Castro-Borges, M. Balancán-Zapata, P. Quintana-Owen, and E. Maldonado-Bandala ......................................................... 56

Corrosion Basics: Protective Coatings .................................................. 80

November 2012 (No. 11)

Discussing the Corrosivity Issue of Transporting Diluted Bitumen in Transmission Pipelines, Kathy Riggs Larsen ...................... 26

Testing Old Cathodic Protection on Ohio Bridge Decks, Jack Bennett, Thomas Turk, Clem Flolotte, and Matt Sexton ......................... 31

Locating Disbonded Coatings with EMAT Technology—Part 2, Richard Norsworthy, Jörg Grillenberger, Matthias Jurgk, and Carsten Heinks ......................................................... 44

Effect of Nitrogenous Compounds on Corrosion of Carbon Steel in Eutrophic Freshwaters, Li Jiang, Yaling Song, Lishan Tu, Lixia Sun, Yunshan Yu, Hongliang Ge, and Guoying Wei ......................................................... 54

Calcium Carbonate Scale Formation and Inhibition in the Presence of Zinc Ions, Qiwei Wang, Faez Al-Dawood, and Hamad AlSafiari ......................................................... 60

Corrosion and Remediation for Bridges in Mexico, Rafael Soto-Espitia, José Roberto Vázquez González, Salvador Ascencio Gutiérrez, Edgar Maya, Lorenzo M. Martínez de la Escalera, Jorge I. Canto Ibanez, and Lorenzo Martinez-Gómez ......................................................... 66

Stress-Oriented Hydrogen-Induced Cracking Behaviors of L360QS Steel, Shuqi Zheng, Chanyu Li, Changfeng Chen, Ming Yang, and Yameng Qi ......................................................................................................................... 71

Corrosion Basics: Engineering Materials .................................................. 88

©NACE INTERNATIONAL
December 2012 (No. 12)
Controlling Corrosion of Buried Piping in Nuclear Power Plants, Kathy Riggs Larsen .......................................................... 26
Renewal of Cathodic Protection on a Seawater Intake Structure, G. Yan, L. Yan, and Zhu Xichang ............................................................... 32
ADFT—A New Statistical Approach for Painting Work Acceptance, Łukasz Augustyński, Flávio Augusto dos Santos Serra, Joaquim Pereira Quintela, and Victor Solymossy .......................................................... 38
Internal Corrosion Health Check Advised for Liquid and Gas Pipeline Operators, Richard B. Eckert .......................................................... 48
A New Shutdown Protection Technology Using ODA for Gas-Fired Power Plants, Hu Jia-Yuan, Cao Shan-An, and Xie Jian-Li .......................................................... 54
Phorgotten Phenomena: Nickel-Containing Alloys for the Biopharmaceutical Industry, Hiru Ahluwalia .......................................................... 60
Failure Analysis of Condenser Tubes, Abdulaziz Al-Meshari .......................................................... 62
Corrosion Basics: Failure Analysis and Design Considerations: Fluid Velocity Effects .......................................................... 88

January 2013 (No. 1)
Serving the Corrosion Industry for Seven Decades: NACE Celebrates its Platinum Anniversary in 2013, Gretchen Jacobson .......................................................... 24
Case History: Stray Current Interference form a Light Rail Transit System, Earl L. Kirkpatrick .......................................................... 32
Factors Impacting Biopolymers and Synthetic Polymers as Iron Oxide Dispersants for Industrial Waters, Zahid Amjad, and Jordan Groubert .......................................................... 46
Can We Better Address CUI and Energy Loss?, Sridhar Srinivasan, Peter F. Ellis Il, Monica M. Chauviere, and Russell D. Kane .......................................................... 52
Flushing of Soldering Flux from Drinking Water Plumbing in New Construction, Meredith Raetz, Jeffery L. Parks, Amanda Martin, Paolo Scardina, and Marc Edwards .......................................................... 60
Corrosion Basics: Corrosion Damage in Reinforced Concrete .......................................................... 80

February 2013 (No. 2)
Defense Department Launches E-Portal Dedicated to Corrosion Training, Cynthia Greenwood .......................................................... 22
Corrosion Protection of Steel Offshore Piles in a LNG Terminal, Zhu Xichang, L. Yan, and G. Yan .......................................................... 26
Lining Considerations for Concrete Secondary Containment Structures, Mark F. Bollinger .......................................................... 32
Phorgotten Phenomena: Multiple Certifications Benefit the Coatings Industry, Ken Judice, Jr. .......................................................... 36
Chemically Treating Assets in the Bakken Formation, Jennifer Wong-Dickson, and Sherry Thomson .......................................................... 42
Corrosion Fatigue Failure of Boiler Tubes at a Fertilizer Plant, Abdel-Monem El-Batahgy, and Esam Rabab .......................................................... 48
Failure Analysis: Root Cause Failure Analysis of a Boiler Feed Pump Main Oil Pump Gear, M. Mobin, A.U. Malik, Fahd Al-Muaili, and M. Al-Hajri .......................................................... 52
Corrosion Basics: Polymeric Materials .......................................................... 192

March 2013 (No. 3)
Historic Corrosion Tools Tell the Story of Early Corrosion Control, Mark Lewis, and Kathy Riggs Larsen .......................................................... 24
Using the 100-mV Criterion for Protection of New Structures, Javad Khosravi, and S. Sadegh Mir Ghafourian .......................................................... 30
FBE Coatings for High-Temperature Pipeline Applications, Jose Martin Lizcano Contreras, Miguel Mateus Barragan, Alban Jaimes Suarez, and Miguel Manrique Rojas .......................................................... 38
Controlling Copper-Based Fouling in Industrial Water Systems, Zahid Amjad .......................................................... 50
Investigation of Reinforced Concrete Pipe Supports in a Fluorhydric Acid Alkylation Unit, Li Yan, Chen Yuan-Long, Yang Xia, and Dong Ai-Min .......................................................... 58
Tribological Behavior of Graphite/Brass Composite, Zohair Sarajian, and Farzad Jaafari Jouzan .......................................................... 62
Corrosion Basics: Close-Interval Potential Surveys .......................................................... 80

April 2013 (No. 4)
Oil Industry Launches New Marine Terminal Information System, Todd Hendrex Phorgotten Phenomena: Is Compressed Breathing Air Safe?, Ken Judice, Jr. .......................................................... 4
Impact of Circulation and Water Treatment on Boiler Tube Failures, Kumar Kembaiyan, William D. Miller, Robin W. Klick, Stephen M. Collins, Mathew Leach, and Mark Phillips .......................................................... 44
Case History: Failure Analysis of a Cracked Stainless Steel Holder in a Condensate Stabilizer Unit, Abdel Salam Hamdy Makloof, and Ahmed I.Z. Faraha .......................................................... 8
Al-Si Grain Refinement in a Semisolid-Metal Process, Zohair Sarajian .......................................................... 54
Tribological Behaviors of Epoxy/HPCP Composites under Dry Sliding Conditions, Sigang Zhang, Qiang Guo, Wenkai Zhai, Zhengping Zhao, and WeiLi Lu .......................................................... 80
Corrosion Basics: Inhibitors for Waters of Low to Moderate Salt Concentrations .......................................................... 80

May 2013 (No. 5)
Managing Corrosion of Pipelines that Transport Crude Oils, Kathy Riggs Larsen .......................................................... 8
Stray Alternating Current Problems in Concrete Power Poles, A. Aghajani, M.A. Golozar, A. Saatchi, K. Raeissi, M. Urgen, and S. Shabani .......................................................... 36
The Importance of Using the Manufacturer’s Recommended Thinner, Dan Savage .......................................................... 44
Mitigating Carbon Dioxide Corrosion in Wet Gas Systems, Sunder Ramachandran, Vladimir Jovancevic, Patrick Rodgers, Ibraheem A. Ahmed, and Maslat Al-Waranib .......................................................... 56
Investigation of Microbiologically Influenced Corrosion in Pipeline Hydrotesting Using Seawater, Kai Li Zhao, Tingyue Gu, Ivan Cruz, and Arjan Koplita .......................................................... 64
Erosion of Control Valves in Gas Transmission Lines Containing Black Powder, Abdelmounam Sherik, and Ehab El-Saadawy .......................................................... 70
Preventing Corrosion under Isolation with Fiber-Reinforced Polymer Laminates, Larry Deaton .......................................................... 74
Corrosion Basics: Locating Pipeline Coating Defects with a Pearson Survey .......................................................... 96
Corrosion 2013 Plenary Lecture: Corrosion When You See the Signs, Which Way Do You Go?, Peter Elliott, FNACE .............................................................. 30
Phorgotten Phenomena: Impressed Current Cathodic Protection Requires Constant Power, John H. Fitzgerald III, FNACE ........................................... 36
Phorgotten Phenomena: The Importance of the Product Data Sheet, Ken Judice, Jr. ................................................................. 40
Blue-Stained Sealants Do Not Imply Catastrophic Corrosion of Medical-Grade Copper Piping, Peter Elliott, FNACE ........................................... 56
Ductile Iron Corrosion Science and Theories, Michael J. Szlega ......................................................................................................................... 58
Evaluating PE Encasement on DI Pipe in a Severely Corrosive Environment, Mike Horton, P.E., and George L. Ash ........................................... 64
Corrosion Basics: Open Recirculated Cooling Water Systems ................................................................. 96

July 2013 (No. 7)
Average Corrosion Salaries Reach New Highs in North America and Europe, Kathy Riggs Larsen ........................................................................ 154

August 2013 (No. 8)
Failure Modes of Coatings on Offshore Oil and Gas Platforms, Kathy Riggs Larsen ................................................................. 26
Stray Alternating Current and Environmental Effects on Concrete Power Poles, A. Aghajani, M.A. Golozar, A. Saatchi, K. Raeissi, M. Urgen, and S. Shabani ........................................................................................................ 30
Corrosion-Resistant Properties of Modified Polymer/Clay Nanocomposites, Alisina Toloei, Sanam Atashin, and Mohammad Ebrahimi Bahrololoom ......................................................... 38
Corrosion Rate as Key Performance Indicator in the North Slope, Olayoke Olubisi ......................................................................................... 50
Vapor Corrosion Inhibitors for Top-of-the-Line Corrosion, Boris A. Miksic, FNACE, Ming Shen, Alla Furman, Rita Kharsan, and Tim Whited .......... 56
The Evolution of the Corrosion Management Concept, Ali Morshed ........................................................................................................... 66
Fiber-Reinforced Polymers for Pipeline Repairs, Larry Deaton .................................................................................................................... 70
Corrosion Basics: Materials in High Temperatures ......................................................................................... 96

September 2013 (No. 9)
Computer Modeling Predicts Ballast Tank Corrosion, Kathy Riggs Larsen ......................................................................................... 28
Cathodic Protection of Seawater Condenser Water Boxes, Zhiyuan Liu, John Yang, and Warapong Hongtaweew ........................................................................................................ 32
Phorgotten Phenomena: It’s Not Just Paint—A Qualified Inspector Is Still Needed, Ken Judice, Jr. ................................................................. 42
Corrosion Inhibition of Sales Gas Transmission Pipelines, Abdelmounaamen M. Sherik and Arnold L. Lewis ......................................................... 52
Corrosion of Copper Coils in Air Conditioning Equipment, A. Calderas, N. Santillan, B. Valdez, and M. Schorr .................................................. 60
Analytical Corrosion Evaluation of Carbon Steel in Seawater—Part One, S. Atashin, A.S. Toloei, and M. Pakshir ........................................................................................................... 64
Corrosion Basics: Water Constituents ........................................................................................................ 88

October 2013 (No. 10)
California Water District Uses Inorganic Zinc to Replace Lead Coating on Water Pipelines, Kathy Riggs Larsen ......................................................................................... 24
Protecting Concrete Power Poles from Stray Alternating Current, A. Aghajani, M.A. Golozar, A. Saatchi, K. Raeissi, M. Urgen, S. Shabani, and L. Bertolini ........................................................................................................ 30
Use of Nano-cleaning Systems in the Farm Industry, Jim Deardorff ......................................................................................................... 38
High-Temperature Crude Oil Testing of Tank Linings, Gard Reian ............................................................................................................ 42
Detecting and Monitoring Corrosion under Insulation in Piping, Jerome R. Singer, Glen Stevick, and Derek King ......................................................................................................... 46
Analytical Corrosion Evaluation of Carbon Steel in Seawater—Part 2, A.S. Toloei, S. Atashin, and M. Pakshir ........................................................................................................... 54
Corrosion Basics: Coating Condition Surveys .......................................................................................... 72

November 2013 (No. 11)
The Mechanism behind Reinforcing Steel Corrosion in Underwater Tunnels, Kathy Riggs Larsen ........................................................................ 22
Evaluation of Galvanized Steel Corrosion in Mechanically Stabilized Earth Walls, Pouria Ghods, Victor Padilla, and Akrum Alfantazi, FNACE ........................................................................ 29
Laboratory Testing Predicts Long-Term Degradation of Insulating Materials, L.D. Stephenson, Andrew Heffron, Brenda Mehrnet, and Debbie Lawrence ........................................................................... 37
Use of UV Spectroscopy for Detecting Migrating Corrosion Inhibitor Depth in Concrete, Boris A. Miksic, FNACE, Ming Shen, and Joshua Hicks ............................................................................ 48
Early Concrete Testing and Interpretation for Long-Term Preventive Measures, Paul A. Noyce and Gina L. Crevello ............................................................................................................ 54
Bridge Tendon Failures in the Presence of Deficient Grout, Kingsley Lau, Ivan Lasa, and Mario Paredes .......................................................................... 64
Corrosion Basics: Atmospheric Corrosion of Iron and Steel ........................................................................... 80

December 2013 (No. 12)
Forensic Investigation of the Deepwater Horizon Blowout Preventer, Shane R. Finneran, Neil G. Thompson, FNACE, Barbara N. Paddock, and Brandon C. Rollins ........................................................................................................ 30
Procedures for Correct Connection of Cathodic Protection Rectifier Cables, W. Brian Holshausen ......................................................................................... 37
Effect of Tropical Environment in Transmission Towers, Oladis Troconis de Rincón, FNACE, Miguel Sánchez, Nathalie Romero, Mariandel Fernández, Orlando Salas, Sebastián Delgado, and Omar Ruiz ........................................................................................................ 46
Corrosion-Resistant Pipe Made by High-Density Infrared Fusion Cladding, Anupam Ghildyal ........................................................................... 51
Formation and Control of Manganese-Based Deposits in Industrial Water, Zahid Amjad ......................................................................................... 62
Corrosion Management Applications for Seawater Injection Systems, Ali Morshed and Mir Sajjad Moussavi ........................................................................... 70
Analysis of Computer Systems Damaged by Corrosion, Gustavo López Badilla, María Marcela Acosta Gomez, Elizabeth Romero Samaniego, Sandra Luz Toledo Perea, Luis Jesús Cruz Moreno, Dina Hernández Villasana, Cruz Alberto Patiño Aguirre, and Yohana Romero Avila ........................................................................... 76
Corrosion Basics: Steam Generation in Power Plants ........................................................................... 96
MP•LIT INDEX TO MATERIALS PERFORMANCE

August 2014 (No. 8)
Updating NACE SP0169 for Controlling External Corrosion on Underground or Submerged Metallic Piping Systems, Kathy Riggs Larsen ................................................. 24
Power Plant Condenser Tube Sheet Retrofit with Epoxy Cladding and CP Evaluation, Zhiyuan Liu and John Yang .................................................................................. 32
The Pursuit of a Green Carbon Steel Corrosion Inhibitor—Part 1, Matthew LaBrosse and Donovan Erickson ............................................................. 46
An Analysis of the Updated Cost of Corrosion in India, R. Bhaskaran, Lalit Bhalla, Azefar Rahman, Sarachi Jana, Umpa Sonik, Sukhpreet Kaur, Jasmeet Kaur, and R.S. Renasawamy ........................................................................ 56
Welding Consumable Issues on Corrosion of X65QT Steel, Balraj Veli, Rajnish Garg, Mukes Saxena, and Paul Rostron .............................................. 66
Corrosion Basics: Stress Corrosion Cracking ........................................... 116

September 2014 (No. 9)
Cathodic Protection Design for Offshore Wind Turbine Foundations, Sameer Ayyar, Jacob Jansson, and Ruth Sorensen .......................................................... 26
Alternating Current Interference and Alternating Current Corrosion of Pipelines—Part 1, David H. Kroon .............................................................................. 30
Development of Anti-Cathodic-Disbonding Epoxy Coating, Han Zhongzhi, Guo Xiaojun, Zhang Qibin, Duan Shaoming, He Yiyou, and Liu Haoliang ............ 36
The Pursuit of a Green Carbon Steel Corrosion Inhibitor—Part 2, Matthew LaBrosse and Donovan Erickson ............................................................. 48
Phorgotten Phenomena: Monitoring of Chemical Treatment Is Essential to Prevent Internal Corrosion, Tata L.N. Murthy .................................................. 54
Immersion Corrosion of Mild Steel and Low Alloy Steel in Eutrophic Freshwater Lakes, Rui Jiang, Diyong Yang, Yuwei Zhao, Yixin Wang, Xiaohui Mao, Fuxing Gan, and Li Jiang ............................................................. 58
Corrosion Basics: Failure Analysis and Design Considerations: Fluid Velocity Effects ........................................................ 88

October 2014 (No. 10)
Using Digital Image Analysis to Assess Pull-Off Adhesion Test Results, Kathy Riggs Larsen .......................................................... 26
Alternating Current Interference and Alternating Current Corrosion of Pipelines—Part 2, David H. Kroon .......................................................... 26
Coating Failures—A Coating Supplier’s Perspective—Part 1, Russell Spotten .................................................................................. 31
Coatings Failure: Mechanical Flaw or Human Fault? Łukasz Augustyński and Agnieszka Królkiowska .......................................................... 34
Eliminating Coating Failures—A Case Study for Achieving Long-Term Cost Savings in the Oil Field, Doug Weybright and Ed Darriman ............ 38
Peculiar Corrosion Behavior of Type 316L SS in Simulated Cooling Water at Various pH Values, A. Farooq, K.M. Deen, I.H. Khan, M.A. Raza, R. Ahmad, A. Salam, and W. Haider .......................................................... 44
Corrosion Associated with Liquid-Liquid Mixing Points, Frank N. Smith .......................................................... 48
Corrosion Basics: The Fundamentals of a Coating ........................................ 68

November 2014 (No. 11)
Mitigating Structural Steel Corrosion Protects Decorative Façade of the Historic Elks Veterans Memorial, Gina Crevello, Paul Noyce, and Kathy Riggs Larsen .............................................................................. 26
Cost Effective Cathodic Protection System for Concrete Structures, Miki Funahashi, Todd Sirola, and Dennis McIntaggart .......................................................... 29
Coating Failures—A Coating Supplier’s Perspective—Part 2, Russell Spotten .................................................................................. 40
Corrosion Control of the Severn Bridge Main Suspension Cables, Paul Lambert and Jeffrey Fisher .............................................................................. 46
Impact of Iron Oxide on Calcium Carbonate Inhibitors—Part 1, Zahid Amjad and Jeremy L. Penn .......................................................... 52
Corrosion on the New Eastern Span of the San Francisco-Oakland Bay Bridge, Yun Chung .................................................................................. 58
Material of Construction for Underground Coal Gasification Wells, S. Bhat, Bipin Kumar, and M.V. Katarki .......................................................... 64
Corrosion Basics: Coating Concrete ........................................................ 88

December 2014 (No. 12)
Diagnosing Microbiologically Influenced Corrosion in a Pipeline, Kathy Riggs Larsen .............................................................................. 26
The Influence of a Grounding System on Cathodic Protection, Gan Cui, Zhi Li, Xue Bai, and Jianguo Liu .............................................................................. 32
Influence of Mg Addition on Corrosion Behavior of Ion Vapor Deposited Al Coatings, Nayef M. Alani, A. Leyland, A.I. Yerokhin, and A. Matthews ............ 40
Impact of Iron Oxide on Calcium Carbonate Inhibitors—Part 2, Zahid Amjad and Jeremy Penn .......................................................... 52
Should Supercritical CO2 Pipelines Comply with ANSI/NACE MR0175/ISO 15156? B. Craig, FNACE .............................................................................. 60
Effects of Highly Polluted Atmospheres on Power Distribution Systems, A. Aghajani and M. Urgen .......................................................... 64
Monitoring Pipelines for Microbiologically Influenced Corrosion, John J. Kilbane .......................................................... 68
Corrosion Basics: Vehicular Corrosion, Norm Moriber .......................................................... 96

January 2015 (No. 1)
Sensors Can Predict Corrosive Conditions in Military Aircraft, Kathy Riggs Larsen .............................................................................. 32
Sacrificial Anodes for Cathodic Protection in the Oil Industry in Mexico, I. García, B. Valdez, M. Schorr, T.E. Herrera, J.A. Durán, and V. Ramírez ............ 38
A New Perspective on Cathodic Protection Criteria Promotes Discussion, Markus Büchler .............................................................................. 44
Atmospheric Corrosion Issues in Abu Dhabi, Paul Rostron and Chaima Belbarak .............................................................................. 56
Corrosion Management and the Significance of Regular Reporting, Ali Marshal .............................................................................. 68
Corrosion Analysis of the Steel Structure Surrounding a Coal-Fired Boiler Heating Plant, Chunxue Jin, Huijuan Chen, Lingling Wang, and Xiaoyan Zhang .......................................................... 72
Corrosion Basics: Corrosion Inhibitors ........................................................ 88

©NACE INTERNATIONAL
February 2015 (No. 2)
Corrosion Behavior of Galvanized Steel with Exposed Substrate in a Marine Environment, Xujie Yuan, Junxi Zhang, Shiming Zhang, Tian Tan, and Xingchi Ma ................................................................. 24
Integrity Assessment of Thin Organic Films—Part 1, Khaled Habib ........................................ 28
High-Temperature Cathodic Disbondment Testing: Review and Survey—Part 1, Shweei William Guan and J. Alan Kehr ............................................................... 32
A Sour Gas Problem in Sweet Crude Oil Storage Tanks, Tata L.N. Murthy and G. Kannayya Naidu ................................................................. 42
Flow-Accelerated Corrosion in Gas Compression Piping, Mohamed Hanafi El-Sayed ........... 46
Pipeline Monitoring, Economics, and the MRI System, Jerome R. Singer, Glen Stevick, David Rondinone, Derek King, and Ronan Rice ................................. 52

March 2015 (No. 3)
Designing an ICCP System for the Hull of an Arctic Ice-Breaking Vessel, Kathy Riggs Larsen ......................................................................................................................... 30
Failure of Impressed Current Anode Supports on Jetty Piles, A. Aghajani and A. Sattchi .............................................................................................................................. 36
High-Temperature Cathodic Disbondment Testing—Part 2: Parallel Testing, Shweei William Guan and J. Alan Kehr ............................................................... 38
Twenty-Year Tests Expose Steel with Organic Coatings in Marine Environments, Nobuaki Otsuki, Takahiro Nishida, Kazumi Matsuoka, and Kenichiro Imajuku ................................................................................................................................ 44
Integrity Assessment of Thin Organic Films—Part 2, Khaled Habib ........................................ 50
Evaluating Biopolymer Phosphonate Blends as Gypsum Scale Inhibitors for Industrial Waters, Zahid Amjad ................................................................. 52
The Effect of Copper on Crevice Corrosion of Stainless Steels, Roger Francis, FNACE and Glenn Byrne .................................................................................................................. 70
Corrosion Basics: Safe Application of Protective Coatings .......................................................... 88

## September 2015 (No. 9)
- Alumina-Forming Austenitic Alloys Resist High-Temperature Corrosion, Kathy Riggs Larsen .......................................................... 30
- Improved CP Anode Bed Performance Using Conductive Cement Backfill, Naveen A. Khan and Todd Sirota ............................................ 36
- Effect of Humidity on Surface Preparation and Coating Application, R. Prasanna ........................................................................... 42
- Monitoring Efficiency of Corrosion Inhibitors for Carbon Steel in Seawater, Khaled Habib and Adel Fakhraldeen ............................ 50
- Thermal Stress Effects on Deposit Control Polymers, Zahid Amjad and Robert W. Zuhl ................................................................. 54
- Material Selection for Amine Service, Ramesh Singh ...................................................................................................................... 60

## October 2015 (No. 10)
- Cathodic Protection for a Carbonated and Salt-Contaminated Reinforced Concrete Parking Deck, Sajay Math, Ali Akbar Sohanghpurwala, and Clem Firlotte ................................................................. 22
- Corrosion Monitoring and Inhibitors for Production Tubing in Gas Wells, Tata I.N. Murthy .................................................................... 30
- Case History: Wire/Strand Slippage—A Potential Failure Mode for Post-Tensioning Tendons, William H. Hartt, FNACE, John F. Vincent, and Vladimir I. Ivanov ........................................................................ 34
- Corrosion in Public Aquariums, Ryan Tinnea ............................................................................................................................................. 38
- Corrosion Basics: ICCP for Atmospherically Exposed Reinforced Concrete Structures .......................................................................... 56

## November 2015 (No. 11)
- New Mexico’s Iconic Steel Bridge Turns 50, Kathy Riggs Larsen ........................................................................................................... 28
- Mapping the Potentials of Reinforced Concrete Structures, Jack Tinnea .......................................................................................... 34
- Lack of Basic Corrosion Control Results in Catastrophes, Pier Luigi Bonora and Agnieszka Krolikowska .............................................. 52
- Laser Heat Treatment Effects on Corrosion of Grade X80 Welded Pipeline Joints, Kong Dejun and Ye Gudong .......................... 56
- Erosion-Corrosion Behavior of Pipeline Steel, Md. Aninul Islam and Zohier N. Farhat ............................................................. 62
- Corrosion Basics: Tank and Containment Linings .............................................................................................................................. 80

## December 2015 (No. 12)
- New Standards Provide Maintenance Guidelines for the Electric Power Industry, Trudy Schreiner .............................................................. 32
- Internal Cathodic Protection Retrofit for Auxiliary Cooling Water Pipes, Wenhao Sun, Shunying Zou, and John Yang ............................ 38
- Sterilization Properties and Electrochemical Behavior of Modified Coatings, Chun Lei Song, Ke Chai, Jin Yi Wu, Yang Cao, Hai Qiang Lin, and Peng Peng Yang .................................................................................. 44
- Strontium Sulfate Inhibition by Biopolymers and Synthetic Polymers, Zahid Amjad and Justin Albright ..................................................... 54
- Microcorrosion in Boiler Pipelines in Arid Environments, Gustavo López Badilla, Maria Marcela Acosta Gómez, and Elizabeth Romero Samaniego ........................................................................................................ 60
- Corrosion of Copper Alloys in Consumer Electronics Environments, Anand V. Samant and Fritz C. Grensing ..................................... 64
- Corrosion Basics: Steam Generation in Power Plants ....................................................................................................................... 88

## January 2016 (No. 1)
- Using Pipeline Coatings with Cathodic Protection, Kathy Riggs Larsen ............................................................................................... 32
- Fundamentals of Rectifier Operation, Monitoring, and Maintenance, Eric S. Langelund ................................................................ 36
- Cathodic Protection Problems for Gas Pipelines South of Isfahan, Iran, Abbas Aghajani, A. Saatchi, and Mehdi Shirani ...................... 40
- Simulation Modeling and Validation of Cathodic Disbondment Testing, Velu Balraj, Ilavenil Balraj, and Snehalatha ....................... 43
- Investigation and Maintenance Program for a Steel Tubular Pile Coating in a Coastal Power Plant, Zhu Xichang, Ge Yan, Li Yan, Zhang Xiaoben, and OuYang Weiwei ........................................................................... 48
- Plant Integrity Management Through Internal Corrosion Monitoring and Inspection, Moavin Islam, Saleh Al-Sulaiman, Abdul Razzaq Al-Shamari, Amer Jarragh, Yousef Khraibut, and Srinivasan Balasundaram ........................................................................................................ 58
- Corrosion Basics: Close-Interval Potential Surveys ......................................................................................................................... 80

## February 2016 (No. 2)
- Optimization of Sacrificial Anodes for One Offshore Jacket, Zaifeng Wang, Baorong Hou, Jie Zhang, Xiutong Wang, and Zhigang Lan ................................................................. 20
- Double-Layer Silicon Dioxide/Titanium Dioxide Sol-Gel Coating for Wearable Gold Accessories, S. Ramasubramanian, B. Jeyaprabha, and P. Prakash ................................................................. 26
- Selenium-Doped Titanium Dioxide Nanotubes Show Promise as Corrosion-Resistant Bone-Implant Material, Guangzhong Li, Quan-Ming Zhao, Li Cheng, and Hui-Lin Yang ........................................ 32
- Effect of Nitrate Treatment on Corrosion, and Guidelines on Its Implementation, Tony Y. Rizk .................................................................. 36
- Corrosion of Carbon Steel in Trace Hydrofluoric Acid, Henk P.E. Helle .......................................................................................... 42
- Corrosion Basics: Coating Condition Surveys ................................................................................................................................. 196

## March 2016 (No. 3)
- Selecting Stainless Steels for Seawater Pumps, Kathy Riggs Larsen .................................................................................................. 28
- Alternating Current Interference Mitigation for a Cathodically Protected Pipeline, Li Hongqi, Dong Yingjun, and Zhao Xiaomin ..................... 34
- Polymeric Solutions for Microbiologically Influenced Corrosion in the Oil and Gas Industry, Osnay Ohrariz ........................................ 42
- Investigation of Bio-Based Aromatic Acids as Corrosion Inhibitors, Ming Shen, Alla Farman, and Rita Kharshan .......................... 52
- Nonuniform Corrosion of Steel Pipe with a Fluid Flow Containing Carbon Dioxide, Qiang Li and Y. Frank Cheng, FNACE ............................. 58
- Distinguishing Hydrogen Embrittlement from Stress Corrosion Cracking, Yun Chung ......................................................................... 64
- Corrosion Basics: Coating New Construction Seagoing Vessels .................................................................................................... 88
April 2016 (No. 4)
NACE International’s IMPACT Breaks New Ground in the Study of Corrosion Management, Gretchen Jacobson ................................................................. 28
Nanoscale Coatings for Cathodic Protection of Steel, Todd Hawkins, Joe Davis, and Jorma Virtanen ................................................................. 34
What Do You Know About Inorganic Zinc Coatings? Rob Francis .............................................................................................................................. 40
Inhibition of Seawater Steel Corrosion via Colloid Formation, N. Cheng, J. Cheng, B. Valdez, M. Schorr, and J.M. Bastidas ... 48
Controlling Cavitation Damage in Pumps on Oil Offshore Platforms, Abbas Aghajani .......................................................................................... 52
Localized Corrosion Failure of a Hydraulic Pipeline in a Subsea Gas Well, Abdel-Moneim El-Batahgy and Fawaz Agiza ........................................ 56
Corrosion Basics: Protecting Fixed Structures in Seawater................................................................................................................................. 60

May 2016 (No. 5)
Case History—Detecting Pipeline Stress Corrosion Cracking Through Direct Assessment, Ahmed Jawad Khan .......................................................... 28
The Effect of Combined Corrosion Inhibitors on AZ31 Magnesium Alloy, Fengjing Wu, Xiaoqian Liu, Xin Xiao, and Chak-Tong Au. ......................................... 42
Case Histories—The importance of Redox Potential on Corrosion Control, Roger Francis, FNACE, and Dale R. McIntyre ........................................... 48
Rough Sets Method Determines Weighting of Soil Corrosion Parameters, Wang Tianyu, Xu Dayu, Wu Zongze, and Tong Shujiao ........................................ 56
Corrosion Basics: Close Interval Potential Surveys................................................................................................................................. 60

June 2016 (No. 6)
Corrosion Caused Lead-Tainted Water in Flint, Michigan, Kathy Riggs Larsen ................................................................................................. 26
Publicly Available Soil Data for External Corrosion Control, Cal Chapman ................................................................................................. 30
Oxidation and Thermal Shock Resistance of As-Sprayed Coatings, N. Xiang, Y-Q. Guo, C. Wang, J.R. Jin, Y.J. Ge, and R.G. Song ......................................................................................................................... 34
A Multifunctional Additive for Controlling Inorganic Fouling in Industrial Water Systems, Zahid Anjum ........................................................................ 44
Slow Tensile Stress Corrosion Behavior of S355 Steel in 3.5% NaCl Solution, Kong Dejun and Sheng Tianyuan ...................................................... 50
Corrosion Basics: Water Constituents........................................................................................................................................ 58

July 2016 (No. 7)
Results Ported for NACE International’s 2016 Annual Corrosion Career Survey, Kathy Riggs Larsen ............................................................................. 62

August 2016 (No. 8)
Unmanned Aircraft Collect Cathodic Protection Readings on Remote Pipelines, Kathy Riggs Larsen ................................................................................................. 26
Corrosion Behavior of UNS S31083 Duplex Stainless Steel in Western China’s Yardang Soil, Li Xinju, Zhou Lizhi, Chang Zeliang, Meng Zhi Jun, and Song Wenren ........................................................................ 36
Innovative Polymeric Solution for Flanged Pipework Protection, Osmay Oharriz ................................................................................................. 40
Characterization of Black Powder in Gas Pipelines, Arul Bardwaj, Bipin Kumar, Sangeeta R. Prasad, and S.K. Srivastava ........................................ 44
Corrosion Basics: Locating Pipeline Coating Defects with a Pearson Survey........................................................................................................ 54

September 2016 (No. 9)
Managing Refinery Corrosion Risk, Kathy Riggs Larsen ................................................................................................................................. 28
Passivation of Zinc Anodes in Marine Conditions, Abbas Aghajani, Masoud Atapour, and Reza Alibek ........................................................................ 32
Case Study: Fluorocarbon Coating Provides Corrosion Protection in Oilfield Flooding System, Jinxun Li, Yang Liu, Zhuhua Wang, Jigang Wang, and Tianyu Yu ........................................................................ 36
Corrosion Investigation of Ammonia Flue Gas Desulfurization, Zhouyang Lian, Zhengwei Luo, Lirui Yuan, and Wuji Wei ....................................... 40
Localized Corrosion Failure of Type 316 Stainless Steel Drain Pipeline, S.A. Khodir and H. Abdel-Aleem ........................................................................ 44
Corrosion Knowledge Management for Managers, Reza Javaherdashi ................................................................................................................ 48
Corrosion Basics: Open Recirculated Cooling Water Systems................................................................................................................................. 52

October 2016 (No. 10)
Immersed Current Anode Systems for Jetty Piling Protection, Ted Huck and Shailesh Javia ......................................................................................... 22
Materials Performance Classic: Cathodic Protection of a Bridge Deck: Preliminary Investigation, B.F. Stratfull ........................................................................ 26
Applying Cathodic Prevention to Electric Transmission Tower Foundations, Hadi Beirami and Maryam Ehteshamzadeh ........................................... 30
Long-term Field Performance of an Organic Corrosion Inhibitor for Reinforced Concrete, U.M. Angst, M. Bächler, J. Schlumpf, B. Marazzani, and M. Bakalli ........................................................................... 34
Corrosion Management for Sustainable Concrete Infrastructure, Andrea N. Sánchez and Christopher D. Taylor ......................................................... 38

November 2016 (No. 11)
Drones Seen as Safer, Cheaper Choice for Bridge Inspections, Ben DaBose ..................................................................................................................... 28
Improved Corrosion Resistance of Titanium Dioxide-Containing Plasma Electrolytic Oxidation Ceramic Coatings, Y.W. Zhao, Y. Zhang, N. Xiang, and R.G. Song ................................................................. 32
Copper Corrosion Behavior in Stator Cooling Water, Ruyuan Zhang and Shunan Cao ............................................................................................. 40
A Unique Explosion Case Involving a Titanium Reactor, Te-Lin Yau ................................................................................................................... 44
Conventional Concrete Patch Repair of Bridges, Warren Green ........................................................................................................................................... 50
Internal Corrosion Failures: Are We Learning from the Past? Richard B. Eckert ........................................................................................................... 54
Corrosion Basics: Coating Concrete......................................................................................................................................................................... 58

116 MP•LIT INDEX TO MATERIALS PERFORMANCE
©NACE INTERNATIONAL
December 2016 (No. 12)
Assessing Galvanized Steel Power Transmission Poles and Towers for Corrosion, Kathy Riggs Larsen .................................................. 24
Galvanic Cathodic Protection for Power Transmission Tower Grillage Foundations, Peyman Taheri and Mehrooz Zamanzadeh, FNACE .................................................. 30
Practical Challenges in Monitoring and Preventing Microbiologically Influenced Corrosion, Tasha L.N. Murthy .................................................. 40
Deactivating Bacteria to Prevent Sewer Corrosion and Collapse, Choonghee Rhee .................................................. 44
Case History: The Effect of Chlorine Dioxide on Corrosion in Seawater, Roger Francis, FNACE and Claes Hedvall .................................................. 48
Enhancing Microbiologically Influenced Corrosion Mitigation Through Corrosion Management, Ali Morshed .................................................. 52
Corrosion Basics: Atmospheric Corrosion of Iron and Steel .................................................. 76

January 2017 (No. 1)
Protecting a Pipeline When Its Coating Has Aged, Kathy Riggs Larsen .................................................. 24
Cathodic Protection Problem for a Gas Pipeline Near a Compressor Station, Abbas Aghajani .................................................. 30
Methods and Developments in Zinc-Based Anticorrosion Coatings, Mark J. Gore and Sean Smith .................................................. 34
Managing Cooling Water Systems to Prevent Silica Deposition, Libardo A. Perez, Zahid Amjad, FNACE, and Robert W. Zuhl .................................................. 44
Influence of Ball Milling on Electrochemical Properties in Lithium-Ion Batteries, Wenrui Teng and Yang Zhao .................................................. 50
Case History: Corrosion of Preheater Tubes in a Heat Recovery Boiler, Ihee Chowwanonthapunya and Sahadeep Joipradit .................................................. 54
Corrosion Basics: Stress Corrosion Cracking .................................................. 72

February 2017 (No. 2)
15 Years of Industry Insight, Stephanie Marie Chizik .................. 22
Close-Interval Surveys for Hybrid Cathodic Protection Systems, Norman J. Moriber .................................................. 26
The Science Behind Field-Applied Liquid Epoxy Pipeline Coatings, Jerry Holton .................................................. 30
Metalized Coatings in Defense Work, Dave Wixson and Jack Tinnin .................................................. 34
Steam Cycle Corrosion Protection for Pulp and Paper Systems, John A. Kelly and Catherine A. Noble .................................................. 38
Localized Corrosion of Carbon Steel from Hydrofluoric Acid—An Update, John Wodarczyk, Thomas Copeland, Frank Sapienza, and A.C. Gysbers .................................................. 44
Corrosion Basics: Protective Coatings .................................................. 188

March 2017 (No. 3)
Testing Materials for Corrosion in an Icelandic Geothermal Environment, Kathy Riggs Larsen .................................................. 26
An Alternative View of the Cathodic Protection Mechanism on Buried Pipelines, R.A. Gummow, Sorin Segall, and Daniel Fingas .................................................. 32
Case History: High-Temperature Material Selection for a Powder Processing Environment, Roger Barnett .................................................. 38
Calcium Carbonate Scale Formation and Inhibition During Enhanced Oil Recovery, Qiwei Wang, Hamed Al-Badairy, Shouwen Shen, and Waleed Al-Nasser .................................................. 48
Corrosion Analysis of a Newly Installed Family Heating System, Zhanjun Guo and Zhiliang Chen .................................................. 52
Corrosion Resistance of Welds in Type 316L Stainless Steel, Mohammad Esmaillian .................................................. 58
Corrosion Basics: Corrosion and the Environment .................................................. 76

April 2017 (No. 4)
NACE International Roundtable: Risk-Based Inspection for Controlling Pipeline Corrosion, Gretchen Jacobson .................................................. 30
Modeling the Cathodic Protection System for a Marine Platform Jacket, Masood Hajighohami, Keyvan Raeissi, Hamidreza Salimi Jazi, and Saeid Shabani .................................................. 34
Silane Treatment Effective for Concrete Durability, Liu Jiesheng, Li Faping, He Xiang, Liu Xiaofan, and Zhang Rongtang .................................................. 39
Black Powder in Export Gas Lines, Olagoke Olabisi, Saleh Al-Salimani, Amer Farag, Yousef Khuraibut, and Ashok Mathew .................................................. 40
Optimizing an Offshore Platform Cathodic Protection System Retrofit, Hongbo Liu, Jorge Luis Alamilla Lopez, Antonio Contreras Cuevas, Eliceo Sosa Hernandez, and Jose Maria Malo Tomayo .................................................. 56
Localized Corrosion Failure of a Hydraulic Pipeline in a Subsea Gas Well, Abdel-Monem El-Batahgy and Fawaz Agiza .................................................. 56
Corrosion Management and Cost Optimization, Ali Morshed .................................................. 61
Corrosion Basics: Materials in High Temperatures .................................................. 80

May 2017 (No. 5)
Drone Interest Soars, Ben DaBose .................................................. 28
When Polarized Potentials Are Not Practical for a CP Criterion, W. Brian Holtsbaum .................................................. 32
Effect of High Hydrostatic Pressure on Aluminum Coatings, Tong Hui, Han Wenli, Hu Zhongping, Zhang Yanjun, Lin Zhu, Wei Shicheng, and Xu Binshi .................................................. 36
Effects of Nonideal Chemistry on Corrosion Testing, Stephen N. Smith, FNACE, Andre Anderko, FNACE, and Peiming Wang .................................................. 44
Corrosion Analysis in Automotive Electronics, Gustavo López Badilla and Juan Manuel Terrazas Gaynor .................................................. 48
Testing and Validation of Advanced Corrosion Monitoring Technology, Bander F. AlDaajani, Nayeef M. Alanazi, A.M. El-Sherik, and Abdullatif I. AbdullHadi .................................................. 52
Corrosion Basics: Engineering Materials .................................................. 72

June 2017 (No. 6)
Galvanic Corrosion of Stainless-Clad Steel Ground Rods in Acidic Soils, Miaomiao Mu, Songhui Liu, Kaibin Nie, Xinhua Zhang, Qiangqiang Liao, and Aijun Yan .................................................. 24
Phorgotten Phenomena: Specification and Inspection Play a Vital Role in Coating Steel Structures, R. Prasanna .................................................. 28
Fluoride Corrosivity on Mild Steel in Cooling Systems, Alfonso Palazzo .................................................. 44
Degradation of a Thrust Bearing in a Lift Pump on an Electromotor Offshore Platform, Abbas Aghajani ........................................................................................................ 50
Corrosion Basics: Failure Analysis and Design Considerations: Fluid Velocity Effects .............................................................................................................. 92

July 2017 (No. 7)
Results Ported for NACE International’s 2017 Annual Corrosion Career Survey, Kathy Riggs Larsen ........................................................................................................ 61

August 2017 (No. 8)
Retrofitting Wind Turbine Monopiles with Cathodic Protection, Kathy Riggs Larsen ........................................................................................................ 28
Galvanic Interaction Between Carbon Steel and Copper Concentrate, Genny Leinenweber and Luis Cáceres V ......................................................................... 34
The Hidden Damage Done to Protective Coatings, Ron R. Raphoon ..................................................................................................................... 40
Internal Stress Corrosion Cracking of Shale Gas Flowlines, Edward Heaver ........................................................................................................ 50
Effect of Stress on Hydrogen Permeation for X70 Carbon Steel in Seawater, Chuanbo Zheng and Cheng Wang ........................................................................ 54
Corrosion Management and Corrosion Failure Preemption, Ali Morshed ........................................................................................................... 60
Corrosion Basics: Inhibitors for Waters of Low to Moderate Salt Concentrations .......................................................................................... 88

September 2017 (No. 9)
Protecting Concrete Infrastructure from Corrosion, Wesley Fawaz ...................................................................................................................... 28
Coupons for Cathodic Protection Evaluation of Mixed-Metal Piping Systems, Douglas E. Gilroy ...................................................................................... 34
Plasma Electrolytic Oxidation Coatings for Aluminum Alloys, Y. Zhang, W. Fan, H.Q. Du, Y.W. Zhao ............................................................................. 38
Hydrogen Sulfide Tube Failure in a Seawater Heat Exchanger, Hanan Farhat and Roy Johnson ..................................................................................... 42
Electrochemical Approach for Screening Concrete Corrosion Inhibitors, J-Wen Huang, Fred Goodwin, and Frank Apicella ........................................................................... 52
Rust Layer Characterization of a Buried Drinking Water Pipe, Zhanjun Guo and Zhiliang Chen ................................................................................................. 56
Corrosion Basics: Corrosion Inhibitors .................................................................................. 80

October 2017 (No. 10)
Serving the Corrosion Industry for 75 Years, Gretchen Jacobson ...................................................................................................................... 24
75th Anniversary MP Classic: Factors Affecting the Accuracy of Reference Electrodes, Frank J. Ansaint and James R. Dimond ........................................................................ 30
Cathodic Protection in the Water Utility Industry, Mersedeh Akhoondan and Graham E.C. Bell .................................................................................. 34
Abrasives: Salt Contamination and Its Transfer, Austin Darrimon .................................................................................................................. 38
Organochloride Contamination in a Refinery Naphtha Hydrotreater Unit, Nayeef M. Alanazi, Frederick M. Adam, and Muthukumar Nagi ........................................................................... 44
Optimizing Conditions to Control Copper Corrosion in Stator Cooling Water, Zhang Ruiyuan, Cao Shunian, and Zheng Xuefeng ................................................................................ 48
Corrosion Basics: Engineering Materials ...................................................................... 68

November 2017 (No. 11)
Historic Corrosion Tools Tell the Story of Early Corrosion Control, Mark Lewis and Kathy Riggs Larsen .............................................................................. 28
75th Anniversary MP Classic: Electrochemical Removal of Chlorides From Concrete Bridge Decks, John E. Slater, David R. Lankard, and Peter J. Moreland ........................................................................................................ 34
Microarc Oxidation Coatings on Aluminum Alloy Drill Pipe, Yan Shen, Prasanta K. Sahoo, and Yipeng Pan ............................................................................. 42
Organofunctional Silane Corrosion Inhibitor Surface Treatment Protects Concrete, Neal S. Berke, FNACE, Kristin M. Ade, Peter K. DeNicola, and Atri Rungta ........................................................................... 52
Study on Electrochemical Corrosion of 7050 Aluminum Alloy, W.F. Qi, X. Qi, B. Sun, C. Wang, J.R. Jin, and R.G. Song ............................................................................. 58
Effects of Anions on Crevice Corrosion of Copper, Qiufa Xu, Kewei Gao, and Xiaolu Pang ................................................................................................. 64
Corrosion Basics: Impressed Current Cathodic Protection for Atmospherically Exposed Reinforced Concrete Structures ........................................................................... 80

December 2017 (No. 12)
Characterizing Severe Bridge Pile Corrosion in a Florida Marine Environment—A Case Study, Kathy Riggs Larsen .............................................................................. 26
75th Anniversary MP Classic: Mitigation of Induced Voltages on Buried Pipelines, J. Dubkowski ........................................................................................................... 32
Coating Technology for Pump Energy Savings, Cassia Sanada and Osmay Oharriz .................................................................................................... 40
Inhibition of Pitting Corrosion of Type 304 Stainless Steel, Zhaoyang Lian ................................................................................................................ 54
Ranking Asset Integrity Risk of Oilfield Water Handling Systems, Olagoke Olabisi, Abdul Razzaq Al-Shamari, Saleh Al-Sulaiman, Amer Jarragh, and Ashok Mathew ........................................................................... 58
Corrosion Basics: Steam Generation in Power Plants ........................................................................... 80
